

# Settings

The screenshot shows the 'Settings' page of the Dynamatic app. The left sidebar includes sections like Dashboard, Cart Themes, Analytics, Orders, Campaigns, Placements, Widgets, Audiences, Feeds, and Settings (which is currently selected). The main content area is titled 'Settings' and contains several sections:

- Cart Status**: Managing Your Shopping Cart's Visibility with Ease. Includes toggles for 'Show Compared At Price', 'Force Duplicate Gift removal', 'Cart Police', and 'Apply multiple shareable discount link'. A preview image shows a shopping cart interface.
- Font Customization**: Personalizing Typeface and Text Appearance for Optimal Readability and Aesthetic Appeal. Shows a preview of different fonts: Lato, Roboto, Poppins, Inter, Lemon Milk, and Montserrat.
- Custom CSS**: Tailoring Your Cart's Appearance with Personalized Style Sheets. Displays a snippet of CSS code for a footer section.
- AI Upsell Control**: Intelligent Product Variant Selector. Includes a toggle for 'Enable Dynamic Product Recommendation'.
- Custom JavaScript**: Enhancing Your Cart's Functionality with Tailored JavaScript Scripts. Shows a preview of a code editor with some JS snippets.
- Product Sync**: Sync your products from your store to Shopify and display for sale. Shows a preview of a sync interface.

At the bottom, there are links for 'About', 'Privacy', and a help icon.

This documentation provides detailed explanations and usage guidelines for each feature available in the Dynamatic app **Settings** page.

To explore this documentation, simply go through each listed feature (Cart Status, AI Upsell Control, Font Customization, etc.) Click on a feature to learn its purpose, how it works, and how to enable or configure it within your Shopify store using the Dynamatic app.

## 1. Cart Status

When cart status is off.

The screenshot shows the 'Settings' page of the dynamatic app. On the left, there's a sidebar with various sections like Dashboard, Cart Themes, Analytics, Orders, Campaigns, Placements, Widgets, Audiences, Feeds, Settings (which is currently selected), and Installation. The main area has a title 'Settings' and a subtitle 'Managing Your Shopping Cart's Visibility with Ease'. A red box highlights the 'Cart Status' section, which contains a toggle switch labeled 'Cart Status' and the subtext 'Managing Your Shopping Cart's Visibility with Ease'. Below this are other settings: 'Show Compared At Price' (on), 'Force Duplicate Gift removal' (on), 'Cart Police' (on), 'Apply multiple shareable discount link' (on), 'AI Upsell Control' (on), 'Enable Dynamic Product Recommendation' (on), 'Make Checkout Line-Item Removable?' (on), 'Checkout Line-item Options' (dropdown set to 'All Item'), and 'Make Item Variant Editable?' (on). There are also three cards: 'Font Customization' (personalizing typeface and text appearance), 'Custom CSS' (tailoring cart appearance with style sheets), and 'Custom JavaScript' (enhancing functionality with scripts). A 'Product Sync' card is also present.

When Cart Status is turned off, your Shopify store will display the default cart.

The screenshot shows a Shopify store interface. At the top, there's a header with 'Imran QA' (user profile), 'Home', 'Catalog', 'Contact', 'Bangladesh | BDT ₢', a search icon, a user icon, and a cart icon with a '2' notification. Below the header is a 'Your cart' section. It lists two items:

PRODUCT	QUANTITY	TOTAL
	<input type="button" value="-"/> <input checked="" type="button" value="1"/> <input type="button" value="+"/> <span>Tk 600.00</span>	Tk 600.00
	<input type="button" value="-"/> <input checked="" type="button" value="1"/> <input type="button" value="+"/> <span>Tk 749.95</span>	Tk 749.95

At the bottom, it says 'Estimated total Tk 1,349.95 BDT' and 'Taxes, discounts and shipping calculated at checkout.' A large black 'Check out' button is at the bottom right.

When cart status is on.

The screenshot shows the Nividium app's Settings page. On the left is a sidebar with various options like Dashboard, Cart Themes, Analytics, Orders, Campaigns, Placements, Widgets, Audiences, Feeds, Settings (which is selected), General, and Installation. The main area has a title 'Settings' and a section titled 'Cart Status' with the sub-instruction 'Managing Your Shopping Cart's Visibility with Ease'. A red box highlights the 'Cart Status' section, which contains a toggle switch that is currently turned on (blue). Below this are other settings: 'Show Compared At Price' (on), 'Force Duplicate Gift removal' (on), 'Cart Police' (on), 'Apply multiple shareable discount link' (on), 'AI Upsell Control' (off), 'Enable Dynamic Product Recommendation' (on), 'Make Checkout Line-item Removable?' (on), 'Checkout Line-item Options' (dropdown set to 'All Item'), 'Make Item Variant Editable?' (on), 'Font Customization' (example showing 'Inter' font), 'Custom CSS' (example code snippet), 'Custom JavaScript' (example code snippet), and 'Product Sync' (listing three products: 'Product name' with variants 'Available', 'In Stock', and 'Out of Stock').

When Cart Status is turned on, your Shopify store will display the dynamic cart.

The screenshot shows a Shopify store's homepage with a dark background featuring a mountain graphic and a 'NEW ADDITION' banner. A light-colored overlay represents the dynamic cart. It includes a 'Cart slideout' section with a quote from 'John Doe': 'I have enough money to last me the rest of my life unless I buy something.' Below this is a 'COMPLETE YOUR SET' section with a 10% off offer for 'The Collection Snowboard: Oxygen' (regular price \$1,025.00, sale price \$922.50) and two other snowboards ('The Out of Stock Snowboard' and 'The Compare at Price Snowboard'). At the bottom is a 'Your Cart' summary showing a subtotal of \$984.90, a 'Discount Code' input field, and buttons for 'Checkout' and 'Continue Shopping'.

**Step :**

1. Go to the [Dynamatic](#) Settings page
2. Click on Cart Status
3. Go to your own Shopify store ([Store Link](#))
4. Click on your store cart icon. You'll see our Dynamatic cart appearance.

**Note :**

1. When the Dynamatic Cart settings/toggle is off, your default Shopify cart will be used, and when the Dynamatic Cart is on, your default Shopify cart will be off.

**Purpose:**

This setting lets you turn the Dynamatic Cart on or off in your Shopify store.

When Cart Status is ON, your store will use the Dynamatic Cart.

When Cart Status is OFF, your store will use the default Shopify cart.

**How It Works:**

When ON: Customers can add products to their cart and proceed to checkout using the Dynamatic Cart.

When OFF: The default Shopify cart is shown, and customers can add products and proceed to checkout as usual.

## 2. Show Compared At Price

The screenshot shows the 'Settings' page of the dynamatic app. On the left sidebar, 'General' is selected under 'Settings'. The main area contains several sections:

- Cart Status**: Managing Your Shopping Cart's Visibility with Ease. Includes options like 'Show Compared At Price' (switched on), 'Force Duplicate Gift removal', 'Cart Police', and 'Apply multiple shareable discount link'.
- Font Customization**: Personalizing Typeface and Text Appearance for Optimal Readability and Aesthetic Appeal. Shows a preview of different fonts: Lato, Lemon Milk, Roboto, Inter, Poppins, and Montserrat.
- Custom CSS**: Tailoring Your Cart's Appearance with Personalized Style Sheets. Displays a snippet of CSS code:

```
// Type some code ...
/* something.com */ .nav-item {
    margin-top: 8px;
    margin-bottom: 8px;
}
.nav-item h4 {
    font-weight: 500;
    font-size: 11.367px;
    line-height: 14px;
    color: #444444;
}
```

- Custom JavaScript**: Enhancing Your Cart's Functionality with Tailored JavaScript Scripts. Shows a list of tags: area, city, sdfhg, area, city, Tag Name, Product Tag, and Product Tag.
- AI Upsell Control**: Intelligent Product Variant Selector.
- Make Checkout Line-item Removable?**: Options for 'All Item' and 'Make Item Variant Editable?'
- Product Sync**: Sync your products from your store to Shopify and display for sale.

## Own shopify store home page

The screenshot shows the Shopify admin dashboard. The left sidebar includes links for Home, Orders, Products, Customers, Marketing, Discounts, Content, Markets, Analytics, Sales channels, Apps, and Settings. The main content area features a search bar and a message: 'New insights and guides will appear here as we learn more about your store'. Below this is a large red-bordered box containing the text 'Shopify Store' and the number '1'.

## Shopify products admin menu

The screenshot shows the Shopify Admin interface under the 'Products' section. The left sidebar includes links for Home, Orders (123), Products (2), Collections, Inventory, Purchase orders, Transfers, Gift cards, Customers, Marketing, Discounts, Content, Markets, Analytics, Sales channels, Apps, Settings, and Non-transferable Checkout and Customer Accounts Extensibility preview. The main area displays a table of products with columns for Product, Status, Inventory, Category, Channels, and Catalogs. A red box highlights the 'Products' link in the sidebar, and a red number '2' is placed over it. Another red box highlights the first product in the list, 'Sur-Charge title', which has a status of 'Active' and 0 in stock for 100 variants.

Product	Status	Inventory	Category	Channels	Catalogs
Sur-Charge title	Active	0 in stock for 100 variants		2	1
Sur-Charge title	Active	0 in stock for 100 variants		2	1
The Collection Snowboard: Liquid	Active	1,000 in stock		1	1
The Multi-managed Snowboard	Active	1,050 in stock		1	1

The Collection Snowboard: Oxygen	Active	1,000 in stock		1	1
The Multi-location Snowboard	Active	1,050 in stock	Uncategorized	1	1
Selling Plans Ski Wax	Active	3,000 in stock for 3 variants	Uncategorized	1	1
The Videographer Snowboard	Active	1,050 in stock	Uncategorized	1	1
The Complete Snowboard	Active	4,991 in stock for 5 variants	Uncategorized	1	1
The Archived Snowboard	Archived	50 in stock		0	1
The Out of Stock Snowboard	Active	3 in stock		1	1
The Collection Snowboard: Hydrogen	Active	989 in stock	Uncategorized	1	1

Select any product from the list.

This screenshot is identical to the one above, showing the Shopify Admin interface under the 'Products' section. A red arrow points from the 'Products' link in the sidebar to the 'The Multi-location Snowboard' row in the list. This row is highlighted with a red box and has a red number '3' placed over it. The rest of the table and sidebar are identical to the first screenshot.

Product	Status	Inventory	Category	Channels	Catalogs
Sur-Charge title	Active	0 in stock for 100 variants		2	1
Sur-Charge title	Active	0 in stock for 100 variants		2	1
The Collection Snowboard: Liquid	Active	1,000 in stock		1	1
The Multi-managed Snowboard	Active	1,050 in stock		1	1

The Collection Snowboard: Hydrogen	Active	N/A in stock	Uncategorized	1	1

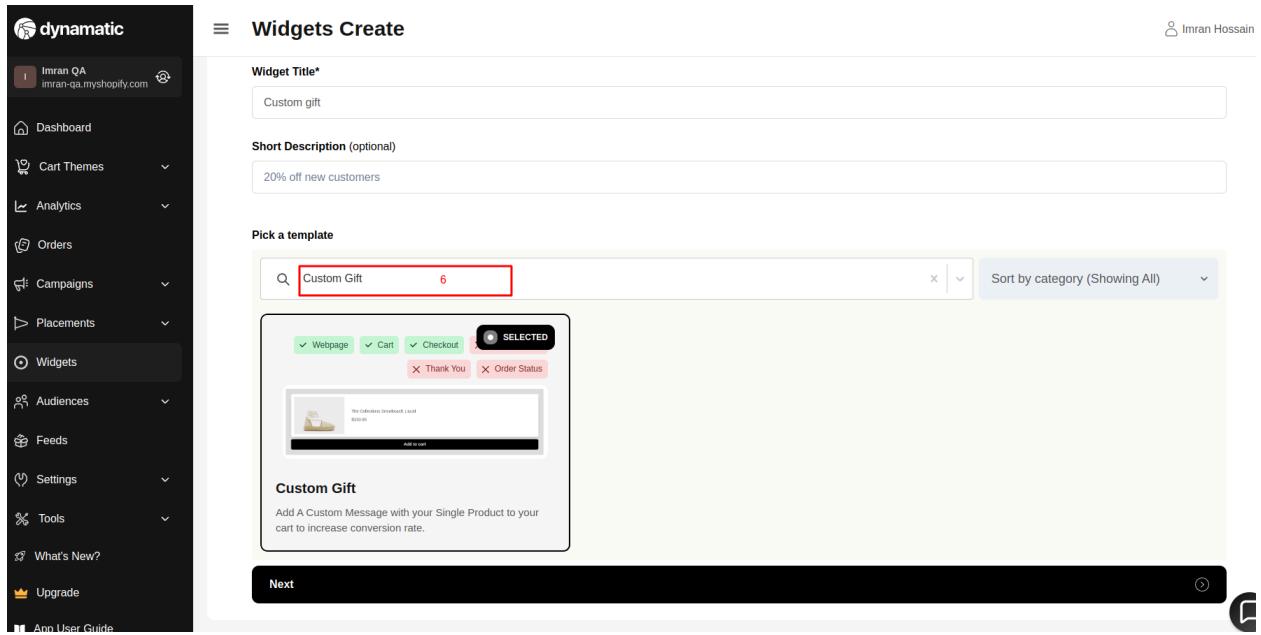

On the product page, click on compare at price

This screenshot shows the Shopify product edit screen for a snowboard. The left sidebar includes links for Home, Orders, Products (selected), Collections, Inventory, Purchase orders, Transfers, Gift cards, Customers, Marketing, Discounts, Content, Markets, and Analytics. The main area displays product media, category (Uncategorized), and a note about metafields. The Pricing section shows a current price of \$729.95 and a compare-at price of \$0.00, which is highlighted with a red box. A checkbox for 'Charge tax on this product' is checked. Below the pricing are sections for Cost per item (\$0.00), Profit, Margin, and Inventory (SKU, Barcode, Track quantity, Continue selling when out of stock). To the right are sections for Sales (No recent sales), Product organization (Type: snowboard, Vendor: Imran QA), Collections (Summer Collection, Automated Collection), Tags (Winter, Sport, Snowboard, Snow, Premium), and Theme template (Default product).

Enter a compare-at price (make sure it's higher than the product's sale price), then click Save.

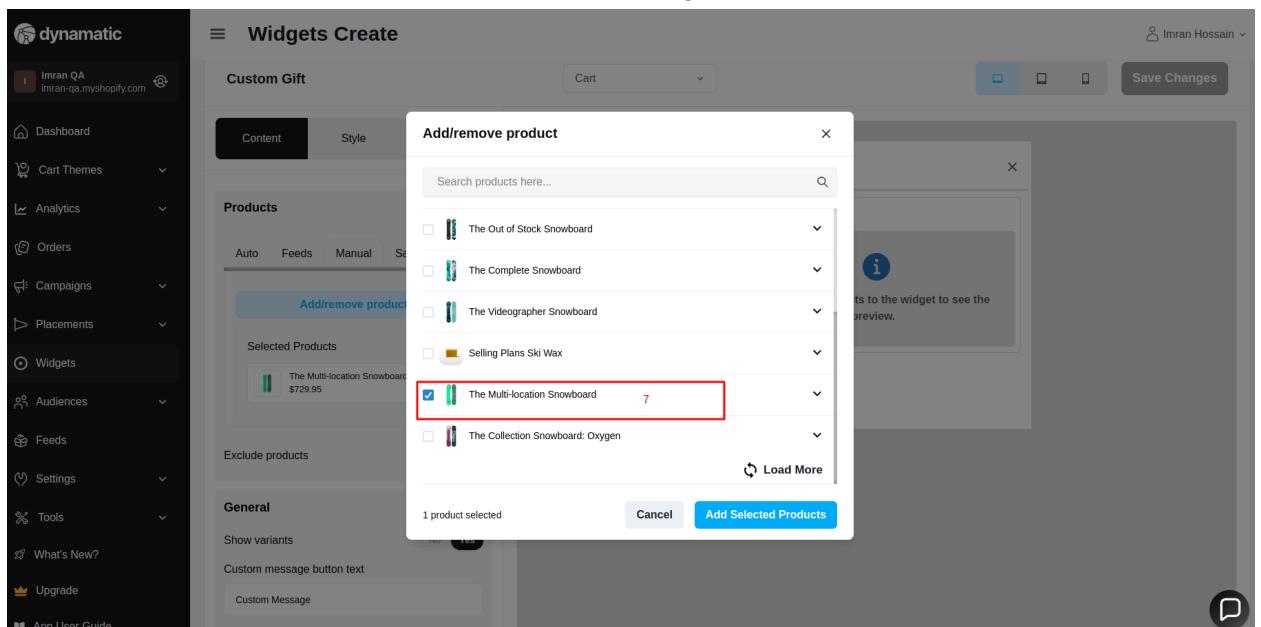

This screenshot shows the same Shopify product edit screen as the previous one, but with a higher compare-at price. The 'Compare-at price' field now contains \$1,000.00, which is highlighted with a red box. The rest of the interface remains the same, including the sidebar, product details, and various settings sections.

Open the Dynamatic app and choose any widget.

The screenshot shows the 'Widgets Create' page in the Dynamatic app. On the left is a sidebar with various app sections like Dashboard, Cart Themes, Analytics, Orders, Campaigns, Placements, Widgets (which is currently selected), Audiences, Feeds, Settings, Tools, What's New?, Upgrade, and an App User Guide. The main area has a title 'Widgets Create' and a sub-section 'Widget Title\*' with the value 'Custom gift'. Below it is a 'Short Description (optional)' field containing '20% off new customers'. Underneath is a 'Pick a template' section where a 'Custom Gift' template is selected, highlighted with a red box. The template preview shows a snippet of code with 'Webpage', 'Cart', and 'Checkout' components selected, and 'Thank You' and 'Order Status' components deselected. A note below says 'Add A Custom Message with your Single Product to your cart to increase conversion rate.' At the bottom is a 'Next' button.

Add the product with the compare-at price to the widget.

This screenshot shows the 'Custom Gift' configuration screen. The sidebar on the left is identical to the previous one. The main area shows the 'Content' tab selected under 'Custom Gift'. A 'Cart' button is visible at the top right. A modal window titled 'Add/remove product' is open, prompting the user to 'Search products here...'. It lists several products: 'The Out of Stock Snowboard', 'The Complete Snowboard', 'The Videographer Snowboard', 'Selling Plans Ski Wax', and 'The Multi-location Snowboard'. The last item, 'The Multi-location Snowboard', has a checked checkbox and is highlighted with a red box. Below the list are sections for 'Selected Products' (showing 'The Multi-location Snowboard' at \$729.95) and 'Exclude products'. At the bottom of the modal are buttons for 'Cancel' and 'Add Selected Products', with '1 product selected' displayed above them. A note in the background says 'Wait to see the preview.'

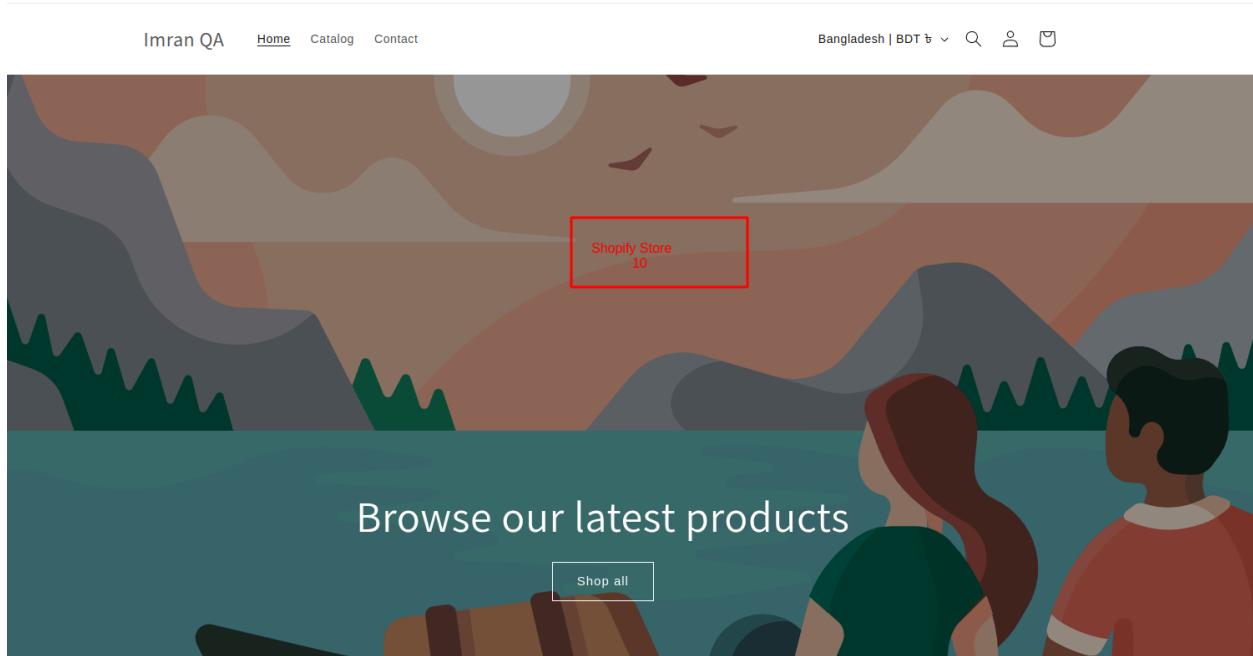

Create a campaign, add this widget to it, and then publish your campaign.

The screenshot shows the 'Create New' campaign interface. On the left is a dark sidebar with navigation options like Dashboard, Cart Themes, Analytics, Orders, Campaigns (selected), Placements, Widgets, Audiences, Feeds, Settings, and Tools. The main area has tabs for 'Variation Level Allocation' and 'Widget Level Allocation', both set to 'Default Allocation'. Under 'Targeting', it shows 'Young Peoples' targeting 'Cart Before Lineitem' from 'May 21, 2025 at 1:54 PM' to 'eternity'. An 'Edit' button is available. Below this is a 'Widgets' section with a table showing one entry: 'Widget Name: CUSTOM GIFT', 'Recommended Zones: Cart, Checkout, Webpage', 'Allocation: 100%', 'Status: ON', and a 'Delete' button. At the bottom left is a large 'Publish Campaign' button with a red border and a small number '8' next to it.

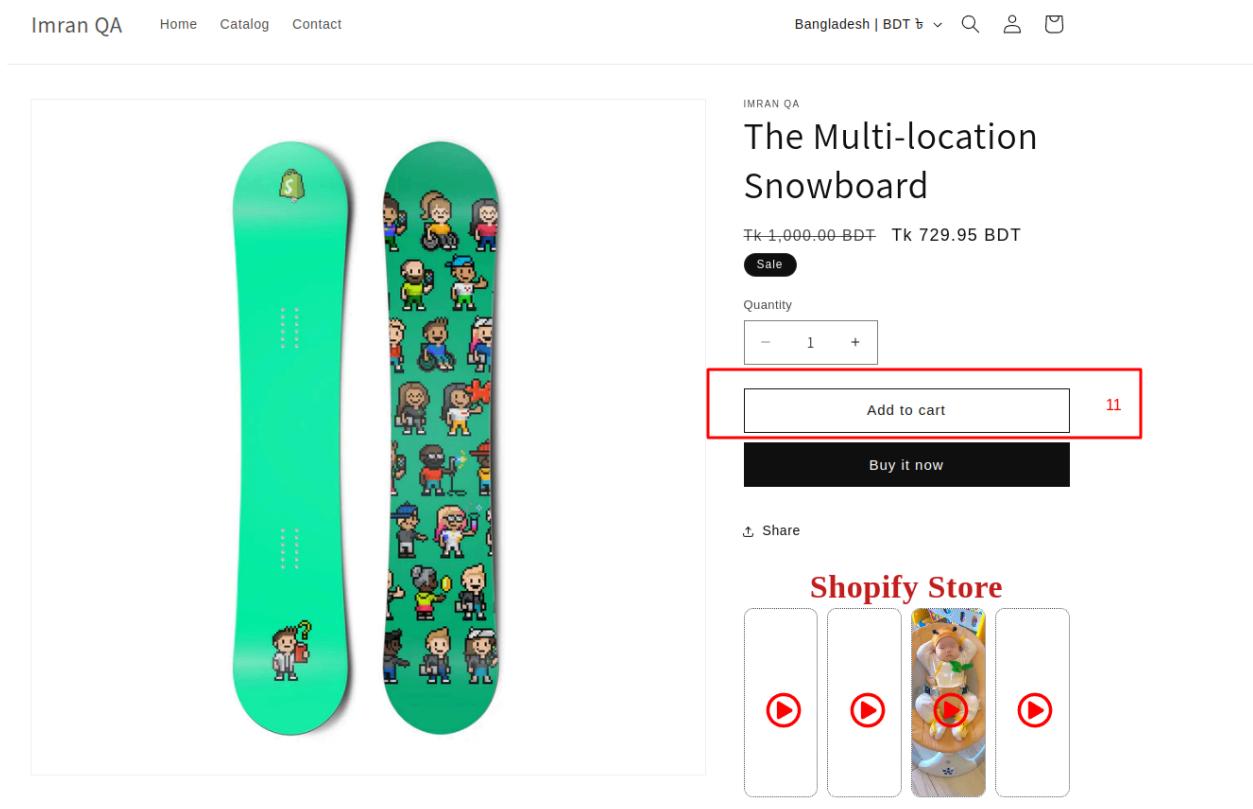

Go to the Dynamatic Settings page turn on Show Compared At Price status button

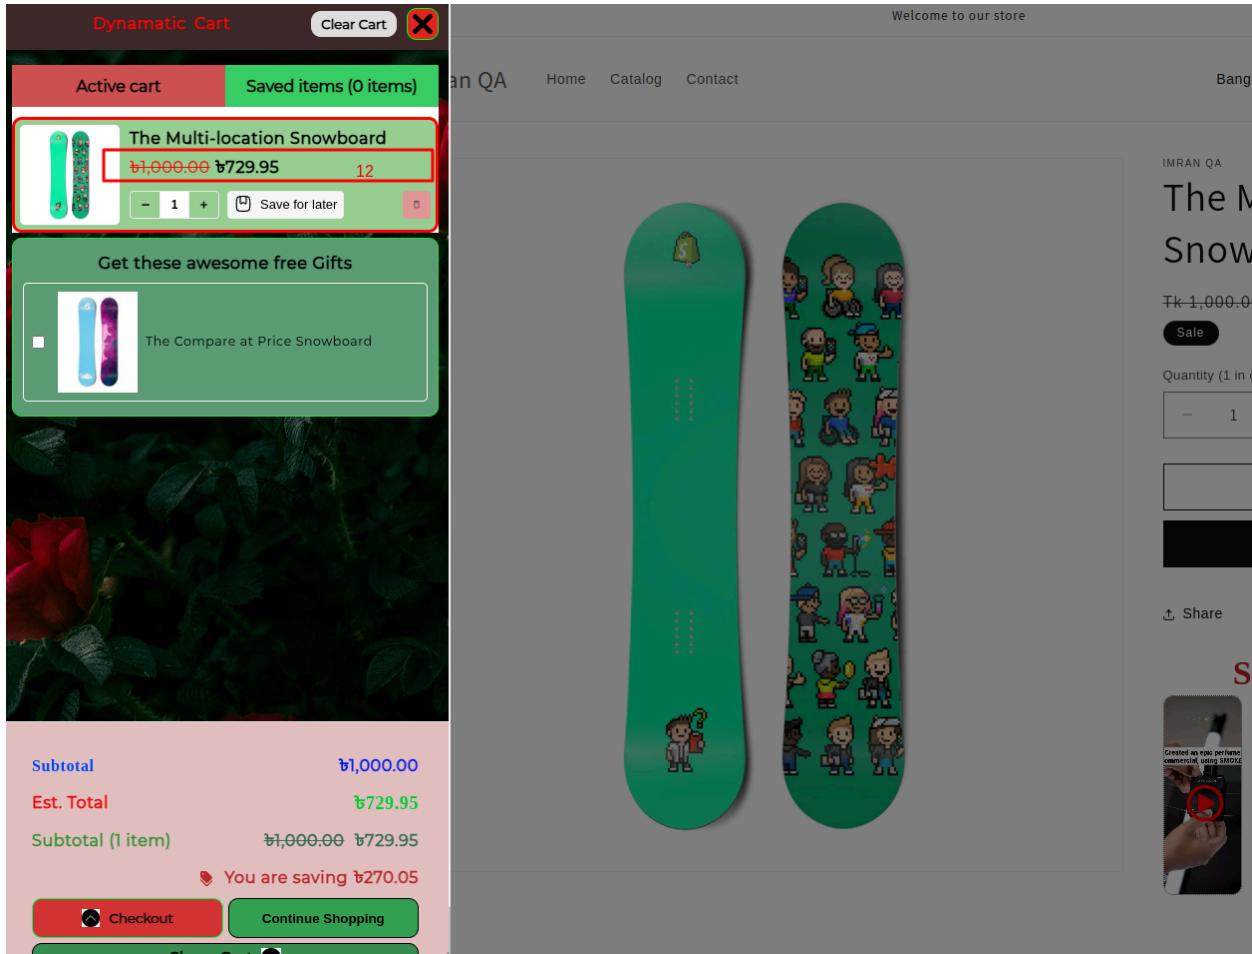

The screenshot shows the 'Settings' page. The left sidebar includes 'General' (selected), Installation, Tools, and What's New? sections. The main area contains several settings cards: 'Cart Status' (Managing Your Shopping Cart's Visibility with Ease), 'Font Customization' (Personalizing Typeface and Text Appearance for Optimal Readability and Aesthetic Appeal), 'Custom CSS' (Tailoring Your Cart's Appearance with Personalized Style Sheets), 'Custom JavaScript' (Enhancing Your Cart's Functionality with Tailored JavaScript Scripts), 'Product Sync' (Sync your products from your store to Shopify and display for sale), and 'AI Upsell Control' (Intelligent Product Variant Selector). A specific 'Show Compared At Price' toggle switch is highlighted with a red box. The 'Cart Status' card shows a preview of a shopping cart interface with various font options like Lato, Inter, Poppins, Roboto, Lemon Milk, and Montserrat. The 'Custom CSS' card displays some CSS code snippets. The 'Custom JavaScript' card shows a code editor with some JavaScript. The 'Product Sync' card shows a grid of product images and names.

Go to your shopify store

Add a product and click on Add to Cart

### Step:

1. Go to your Shopify store homepage.
2. Click on Products in the admin menu.
3. Select any product from the list.
4. On the product page, click on compare at price
5. Enter a compare-at price (make sure it's higher than the product's sale price), then click Save.
6. Open the Dynamatic app and choose any widget.
7. Add the product with the compare-at price to the widget.
8. Create a campaign, add this widget to it, and then publish your campaign.
9. Go to the Dynamatic Settings page turn on Show Compared At Price status
10. Go to your shopify store
11. Add a product and click on Add to Cart

**Note :**

1. If it is turned off, switch it on to activate the Show Compared At Price.
2. The product must have a valid Compare at Price value that is higher than the actual selling price.
3. The product must be added to an active widget, and the campaign must be published.
4. The "Show Compared At Price" toggle in settings must be enabled.

**Purpose:**

Shopify's Compared At Price is used to show customers the original price of a product before a discount. It helps highlight the current sale price by visually comparing it to the regular price.

**How It Works:**

When enabled, customers will see both the original ("Compared At") price and the current sale price.

When disabled, only the current price will be shown.

### 3. Force Duplicate Gift Removal

The screenshot shows the 'Settings' page of the dynamatic app. On the left is a sidebar with navigation links like Dashboard, Cart Themes, Analytics, Orders, Campaigns, Placements, Widgets, Audiences, Feeds, and Settings. The 'General' section is currently selected. The main area has a card titled 'Cart Status' with a sub-section 'Force Duplicate Gift removal' which is turned on (indicated by a blue switch). Other sections include 'Font Customization', 'Custom CSS', 'Custom JavaScript', and 'Product Sync'. A red box highlights the 'Force Duplicate Gift removal' switch.

When force duplicate gift removal status is off.

This screenshot is identical to the one above, but the 'Force Duplicate Gift removal' switch is now turned off (indicated by a grey switch). The rest of the interface remains the same, with the 'General' section of the sidebar selected and various configuration cards visible.

When force duplicate gift removal status is on.

The screenshot shows the 'Settings' section of the dynamic app. On the left, there's a sidebar with navigation links like Dashboard, Cart Themes, Analytics, Orders, Campaigns, Placements, Widgets, Audiences, Feeds, and Settings. Under Settings, there are sub-links for General, Installation, and Tools. The main area has several sections: 'Cart Status' (Managing Your Shopping Cart's Visibility with Ease), 'Show Compared At Price' (with a red box around it and a value of 2), 'AI Upsell Control' (Intelligent Product Variant Selector and Enable Dynamic Product Recommendation), 'Make Checkout Line-item Removable?' (Checkout Line-item Options set to 'All Item'), and 'Font Customization' (Personalizing Typeface and Text Appearance for Optimal Readability and Aesthetic Appeal). There's also a 'Custom CSS' section with code snippets and a 'Custom JavaScript' section. A 'Product Sync' section is shown on the right. A message bubble icon is at the bottom right.

The screenshot shows the 'Widgets' section of the dynamic app. The sidebar includes links for Dashboard, Cart Themes, Analytics, Orders, Campaigns, Placements, Widgets (selected), Audiences, Feeds, Settings, Tools, What's New?, and Upgrade. The main area displays a 'Free Gift' configuration screen. It has tabs for Content, Style, and Advance. Under Content, there's a 'Widget Title\*' field containing 'Free Gift by imran' and a 'Short Description (optional)' field. Below these are sections for 'Products' (Auto, Feeds, Manual, Saved Cart, Tr...) and 'Selected Products' (The Compare at Price Snowboard \$785.95 and The Multi-location Snowboard \$729.95). To the right, a preview of the 'Your Cart' page shows a green overlay with text 'Get these awesome free Gifts' and 'Add \$120 more to get the rewards'. Two products are listed: 'The Compare at Price Snow...' and 'The Multi-location Snowbo...', with a red box highlighting the second product. A 'Save Changes' button is at the top right.

**Widgets**

The screenshot shows the 'Widgets' section of the dynamatic dashboard. On the left is a sidebar with navigation links: Dashboard, Cart Themes, Analytics, Orders, Campaigns, Placements, Widgets (selected), Audiences, Feeds, Settings, Tools, What's New?, and Upgrade. The main area is titled 'Widgets' and contains a configuration form for a 'Custom Gift by imran'. It includes fields for 'Custom Gift by imran', 'Short Description (optional)', and tabs for 'Content', 'Style', and 'Advance'. Below this is a 'Products' section with tabs for 'Auto', 'Feeds', 'Manual', 'Saved Cart', and 'Tr'. A 'Selected Products' box shows 'The Multi-location Snowboard \$729.95'. There are sections for 'Exclude products' (No selected) and 'General' (Show variants Yes selected). A preview window titled 'Your Cart' shows a green overlay with a product card for 'The Multi-location S...' at \$729.95, an 'Add to Cart' button, and a 'Select Variant' dropdown with a red number '4' indicating variant count.

**Campaigns**

The screenshot shows the 'Campaigns' section of the dynamatic dashboard. The sidebar is identical to the previous one. The main area is titled 'Campaigns' and lists several campaigns with columns for 'CAMPIGN NAME', 'NUM OF EXPERIENCES', 'REVENUE', 'IMPRESSIONS', 'TAGS', and 'ACTION'. One specific campaign, 'Force Duplicate Gift removal', is highlighted with a red box and a red arrow pointing to it from the 'Create Campaign' button above the list. Other campaigns listed include 'Gift Widgets', 'Check Out Campaign', 'Add to cart upsell', 'Survey Widgets', 'All campaign cart profile', 'Cart Profile Campaign', and 'Accord'.

Shopify Store

**Step :**

1. Go to the Dynamatic Settings page.
2. Turn on status Force Duplicate Gift removal
3. Then go to 2 gift widgets create the same gift product
4. Create a campaign
5. Publish the campaign.
6. Go to your Shopify store.
7. Add to cart gift products

**Purpose:**

The **Force Duplicate Gift Removal** ensures that customers receive **only one instance of a free gift**, even if the gift conditions are met multiple times.

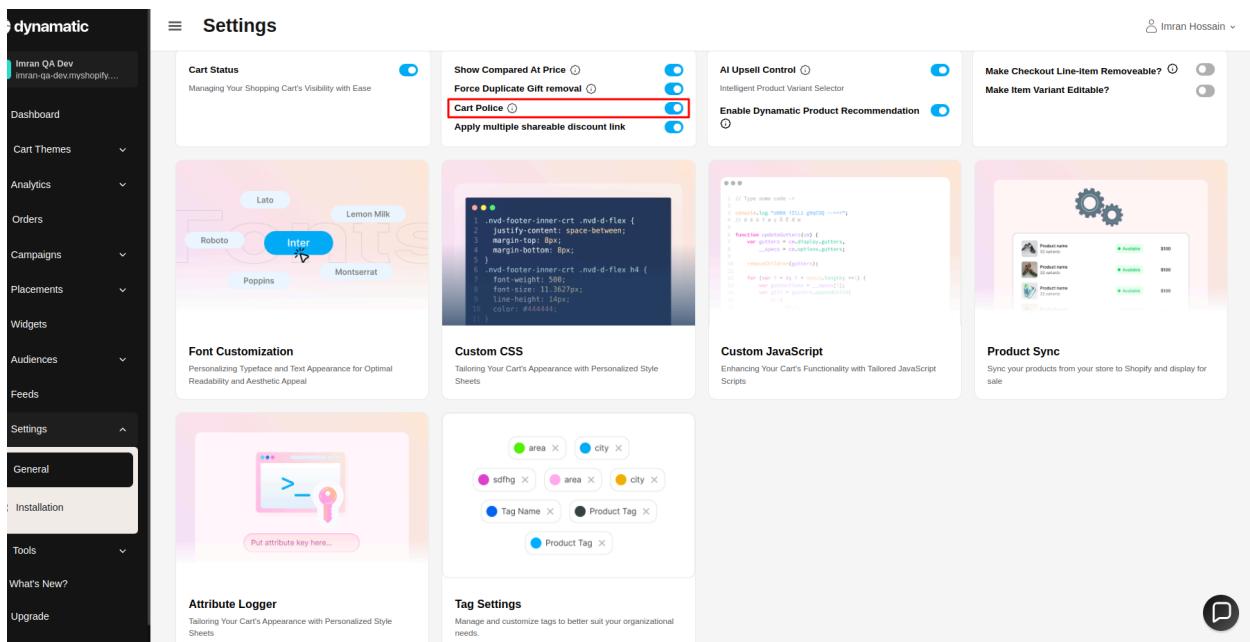

If you unintentionally add a double gift at this time, 1 gift item will automatically be removed from the cart.

**How It Works:**

When this is turned on, Dynamatic will automatically remove any extra free gift items from the cart and keep only one, even if the gift rule is triggered multiple times.

The system silently removes extra instances while keeping the qualified gift intact.

## 4. Cart Police

The screenshot shows the 'Settings' page of the Dynamatic app. On the left, there's a sidebar with various sections like Dashboard, Cart Themes, Analytics, Orders, Campaigns, Placements, Widgets, Audiences, Feeds, Settings (which is selected), Installation, Tools, What's New?, and Upgrade. The main area has several cards. One card titled 'Cart Status' has a section for 'Cart Police' which is highlighted with a red box. Other cards include 'Font Customization', 'Custom CSS' (with some code snippets), 'AI Upsell Control', 'Make Checkout Line-item Removable?', 'Product Sync', 'Custom JavaScript', 'Tag Settings', and 'Attribute Logger'. A user profile 'Imran Hossain' is at the top right.

### Note:

1. To ensure Cart Police functions correctly:
2. API-related actions and cart activity must be trackable through the Dynamatic integration.
3. This feature should be configured before running major campaigns or promotions.

### Purpose:

The Cart Police feature protects your store by disabling cart checkout during suspicious or abusive activity detected through any API actions.

It helps prevent harmful behaviors such as bot activity, bulk add-to-cart attempts, or spam actions that can impact inventory levels, slow down site performance, and negatively affect the shopping experience.

### How It Works:

When enabled, Cart Police actively monitors real-time cart behavior across your storefront.

It detects suspicious patterns such as

Excessive add-to-cart actions in a short period

Repeated attempts to add out-of-stock items

Abnormal usage behavior triggered via APIs

Based on your configuration, the system can automatically take action by:

Temporarily blocking the user's IP address

## 5. Apply multiple shareable discount link

The screenshot shows the Dynamatic app's Settings page. On the left is a sidebar with various tabs like Dashboard, Analytics, Orders, Campaigns, Placements, Widgets, Audiences, Feeds, and Settings. Under Settings, there are sections for General (selected), Installation, Tools, What's New?, and Upgrade. The main area has several cards: 'Cart Status' (Managing Your Shopping Cart's Visibility with Ease), 'Font Customization' (Personalizing Typeface and Text Appearance for Optimal Readability and Aesthetic Appeal), 'Attribute Logger' (Put attribute key here...), 'Custom CSS' (Tailoring Your Cart's Appearance with Personalized Style Sheets), 'Custom JavaScript' (Enhancing Your Cart's Functionality with Tailored JavaScript Scripts), 'AI Upsell Control' (Intelligent Product Variant Selector), 'Product Sync' (Sync your products from your store to Shopify and display for sale), and 'Cart Police' (Force Duplicate Gift removal). A red box highlights the 'Apply multiple shareable discount link' toggle switch under the Cart Police section.

### Note:

To ensure this feature works properly:

1. The discounts used must be configured to allow stacking in your Shopify admin.
2. All discount codes should be created and active in Shopify's Discounts section.

### Purpose:

Enable your store to accept and apply more than one shareable discount link in a single customer session—perfect for combining promotions or running layered campaigns.

### How It Works:

When enabled, Dynamatic allows multiple discount links (discount=FREESHIP) to stack where permitted by Shopify.

If conflicting rules exist, Dynamatic applies them based on priority or predefined rules you set.

## 6. AI Upsell Control

The screenshot shows the dynamatic app's Settings page. On the left is a sidebar with various sections like Dashboard, Cart Themes, Analytics, Orders, Campaigns, Placements, Widgets, Audiences, Feeds, and Settings. Under Settings, there are sub-sections for General, Installation, Tools, and What's New. The main area is titled "Settings" and contains several cards:

- Cart Status**: Managing Your Shopping Cart's Visibility with Ease.
- Show Compared At Price**: Intelligent Product Variant Selector (switched on).
- Force Duplicate Gift removal**: Intelligent Product Variant Selector (switched on).
- Cart Police**: Intelligent Product Variant Selector (switched on).
- Apply multiple shareable discount link**: Intelligent Product Variant Selector (switched on).
- AI Upsell Control**: Intelligent Product Variant Selector (switched on, highlighted with a red box).
- Enable Dynamic Product Recommendation**: Intelligent Product Variant Selector (switched on).
- Font Customization**: Personalizing Typeface and Text Appearance for Optimal Readability and Aesthetic Appeal.
- Custom CSS**: Tailoring Your Cart's Appearance with Personalized Style Sheets. It shows a snippet of CSS code:

```
.nvd-footer-inner-crt .nvd-d-flex {

```
- Custom JavaScript**: Enhancing Your Cart's Functionality with Tailored JavaScript Scripts.
- Product Sync**: Sync your products from your store to Shopify and display for sale.

Go to Shopify store home page

The screenshot shows the Shopify store home page. The left sidebar includes Home, Orders (24), Products, Customers, Marketing, Discounts, Content, Markets, and Analytics. Below that are Sales channels and Apps. The main content area has a "Store" section with a red box highlighting the number "1". A search bar at the top right shows "CTRL + K" and the user "Imran QA Dev". A message in the center says "New insights and guides will appear here as we learn more about your store".

## Click on products

The screenshot shows the Shopify admin dashboard. The left sidebar has a red box around the 'Products' section. The main area is the 'Products' page, which displays a table of products. The columns are: Product, Status, Inventory, Category, Channels, and Catalogs. Each product row includes a small image, the product name, its status (Active), current inventory count, category, and the number of channels and catalogs it appears in.

Choose any product and add variants (e.g., M, L, XL)

This screenshot shows a product detail page for a snowboard. The top part shows media images and basic product details like category and type. The bottom part is the 'Variants' section, which is highlighted with a red box. It shows three size variants: 'M', 'L', and 'XL'. Each variant has a checkbox, a price of \$629.95, and an availability count of 1050. Below this is another red box highlighting a table of variants with columns for Variant, Price, and Available quantity. The table shows three rows for 'M', 'L', and 'XL' with the same values as above. At the bottom, there's a note about total inventory across all locations: 3050 available.

## Turn on Ai upsell control button status

The screenshot shows the 'Settings' section of the dynamatic app. On the right, there's a card titled 'AI Upsell Control' which is highlighted with a red box and has a red number '4' indicating pending notifications. This card includes sub-options like 'Intelligent Product Variant Selector' and 'Enable Dynamatic Product Recommendation'. Other cards visible include 'Cart Status', 'Force Duplicate Gift removal', 'Cart Police', 'Apply multiple shareable discount link', 'Font Customization', 'Custom CSS', 'Custom JavaScript', and 'Product Sync'.

Add the variant product to the widget.

The screenshot shows the 'Widgets' creation interface. A modal window titled 'Your Cart' is displayed, showing a 'COMPLETE YOUR SET' offer. It lists two products: 'The Multi-managed Snowboard...' and 'The Collection Snowboard...'. Both products have dropdown menus for size selection. The size dropdown for the first product is highlighted with a blue border and contains the value 'M'. The size dropdown for the second product is also highlighted with a blue border and contains the value '5'. A red box highlights the size dropdown for the second product. Below each product is an 'Add to cart' button.

Now add this widget and publish the campaign.

The screenshot shows the Dynamatic app's interface. On the left is a sidebar with navigation options: Dashboard, Cart Themes, Analytics, Orders, Campaigns (selected), All, Create New, Placements, Widgets, Audiences, Feeds, Settings, and Tools. The main area is titled 'Campaigns' and displays a campaign named 'Add to cart upsell'. It shows details like Experience Name, Zone (Webpage), Audience (Young Peoples), Allocation Type (Default), Num of Widgets (1), and Status (OFF, ON). Below this is a 'Variation Level Allocation' section with a dropdown set to 'Default Allocation'. A targeting rule is shown: Targeting Young Peoples at Webpage from May 15, 2025 at 2:37 PM to eternity, with an 'Edit' button. Under the 'Widgets' section, there's a 'Widget Level Allocation' dropdown set to 'Default Allocation'. A single widget entry is listed: Widget Name ADD TO CART, Recommended Zones Webpage, Allocation 100%, Status OFF (ON), and a Delete button.

Visit your Shopify store and add product to add to cart now you can see related products.

The screenshot shows a Shopify store page for 'Dynamatic'. A product, 'The Multi-managed Snowboard', has been added to the cart. An 'ADD TO CART' overlay is displayed, showing the product image, price (Tk 629.95), size (M), quantity (1), and a 'Save for later' button. A red box highlights the quantity input field. Below this, a 'COMPLETE YOUR SET' section offers a 10% off deal on 'The Collection Snowboard: Liquid' (Tk 749.95 - Tk 674.96). Another red box highlights the quantity input field here, which is set to 6. The overlay also features a 'Share Cart' button, a 'Saved items (0 items)' section, and a 'Featured products' section with items like an Apple, Fan, Gift Card, and Realme Note 60 smartphone.

**Step :**

1. Go to your Shopify store home page
2. Choose any product and add variants (e.g., M, L, XL).
3. Open the Dynamatic app and select a widget (e.g., List Widget).
4. Add the variant product to the widget.
5. Publish the campaign.
6. Visit your Shopify store.
7. Add the variant product to the cart, and open the Dynamatic Cart in your Shopify store to see AI-generated upsell suggestions and recommended products.

**Note:**

To ensure this feature functions correctly:

1. Products must have variants configured in Shopify.
2. The variant product must be added to an active widget in the Dynamatic app.
3. The campaign must be published for the upsell engine to activate.
4. Make sure your product has to add a variant.

**Purpose:**

Enable or manage Dynamatic's AI-powered upsell engine to automatically suggest relevant products, items, add-ons, upgrades, or complementary products to increase average order value (AOV).

**How It Works:**

When enabled, Dynamatic AI Upsell Control uses customer behavior, cart contents, and product data to generate smart, personalized upsell recommendations.

Upsells can appear on product pages, in the Dynamatic cart, or at checkout.

You can configure where and how upsells appear.

## 7. Enable Dynamatic Product Recommendation

Dynamatic Settings page.

The screenshot shows the 'Settings' page of the Dynamatic app. On the right side, there is a section titled 'AI Upsell Control' which includes a toggle switch for 'Enable Dynamic Product Recommendation'. This toggle is highlighted with a red box. The rest of the page contains other settings like 'Cart Status', 'Font Customization', 'Custom CSS', 'Custom JavaScript', and 'Product Sync'.

Enable the Dynamatic Product Recommendation toggle.

This screenshot is identical to the one above it, showing the 'Settings' page of the Dynamatic app. The 'Enable Dynamic Product Recommendation' toggle is now turned on, indicated by a blue color and a red number '2' next to it. The rest of the interface remains the same.

Go to any widget in the Dynamatic app (List Widget)

The screenshot shows the Dynamatic app interface. On the left is a dark sidebar with various navigation options like Dashboard, Cart Themes, Analytics, Orders, Campaigns, Placements, Widgets (which is selected), Audiences, Feeds, Settings, Tools, What's New?, and Upgrade. The main area is titled "Widgets" and shows a "List" configuration. A red box highlights the "Widget Title" field, which contains "List Widget by imran". Below it is a "Short Description (optional)" field. There are three tabs at the top: "Content" (selected), "Style", and "Advance". Under "Products", there are tabs for Auto, Feeds, Manual, Saved Cart, and Triggers. The "Choose from:" dropdown is set to "Shopify Recommendation Engine". The "Select method:" dropdown is set to "Related". There are also toggle switches for "Exclude products" and "Exclude out of stock items". A "Refresh list options" button is present. To the right, a "Your Cart" modal is open, showing a "COMPLETE YOUR SET" offer with a 10% off one-time offer. It lists a gift card (\$10) and two snowboards ("The Inventory Not Tracked..." and "The Compare at Price Snow..."). Each item has an "Add to cart" button.

Select the Products Auto option now you can see Dynamatic Recommendation Engine

This screenshot is similar to the previous one but shows the "Auto" tab selected under "Products" instead of "Feeds". The "Choose from:" dropdown now shows "Dynamatic Recommendation Engine" as the selected option, indicated by a blue background. The rest of the interface and the "Your Cart" modal are identical to the first screenshot.

Choose Dynamatic Recommendation Engine from the list.

The screenshot shows the Dynamatic app's 'Widgets' configuration screen. On the left is a sidebar with various navigation options like Dashboard, Analytics, Orders, Campaigns, Placements, Widgets (which is selected), Audiences, Feeds, Settings, Tools, What's New?, and Upgrade. The main area is titled 'Widgets' and contains a 'List Widget by imran'. It has fields for 'Short Description (optional)' and tabs for 'Content', 'Style', and 'Advance'. Under 'Products', there are tabs for 'Auto', 'Feeds', 'Manual', 'Saved Cart', and 'Trigger'. A dropdown menu labeled 'Choose from:' is open, showing 'Dynamatic Recommendation Engine' (which is highlighted with a red box) and other options like '5', 'Feeds', 'Manual', 'Saved Cart', and 'Trigger'. Below this are sections for 'Select method:', 'Exclude products', 'Exclude out of stock items', 'Refresh list options', 'Autofill additional items', and 'Limit number of products to show'. To the right, a preview window shows a 'Your Cart' page with a 'COMPLETE YOUR SET' offer for a gift card (\$10-\$9.00) and three recommended products: 'The Inventory Not Tracked...', 'The Compare at Price Snow...', and 'Gift Card'.

Showing to many types of methods, you can choose any one

This screenshot is similar to the previous one but shows a different selection in the 'Select method:' dropdown. The 'Bought Together' option is now highlighted with a blue box. The rest of the interface and preview window are identical to the first screenshot.

## Now create a campaign and add widgets (List Widgets)

The screenshot shows the 'Create New' screen for a campaign. On the left is a dark sidebar with various navigation options like Dashboard, Cart Themes, Analytics, Orders, Campaigns, Placements, Widgets, Audiences, Feeds, Settings, Tools, and What's New?.

The main area is titled 'Experiences' and contains a table for a single experience named 'List Widget by imran'. The columns include Experience Name, Zone, Audience, Allocation Type, Num of Widgets, and Status (OFF/ON). The status is currently ON.

Below the table is a 'Variation Level Allocation' section with a dropdown set to 'Default Allocation'.

Under 'Targeting', the settings are: Young Peoples at Cart Body from May 21, 2025 at 1:16 PM to eternity. There is an 'Edit' button next to these settings.

A 'Widgets' section follows, with a link to 'Add/Edit More Widgets'. It shows a table for a widget named 'LIST WIDGET BY IMRAN'. The columns are Widget Name, Recommended Zones, Allocation, and Status (OFF/ON). The status is ON.

At the bottom right of the main area is a dark circular icon with a white speech bubble symbol.

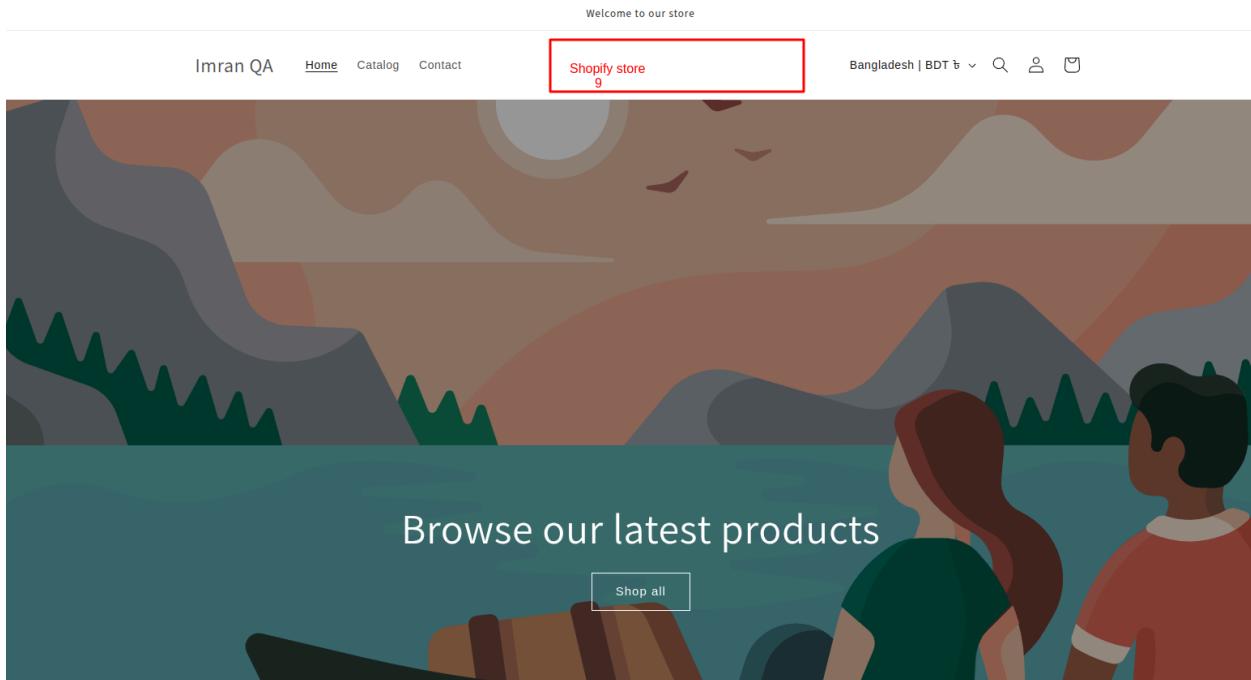

## Now publish your campaign

The screenshot shows the same 'Create New' screen, but the status of the experience and widget has changed. The experience status is now OFF, and the widget status is also OFF.

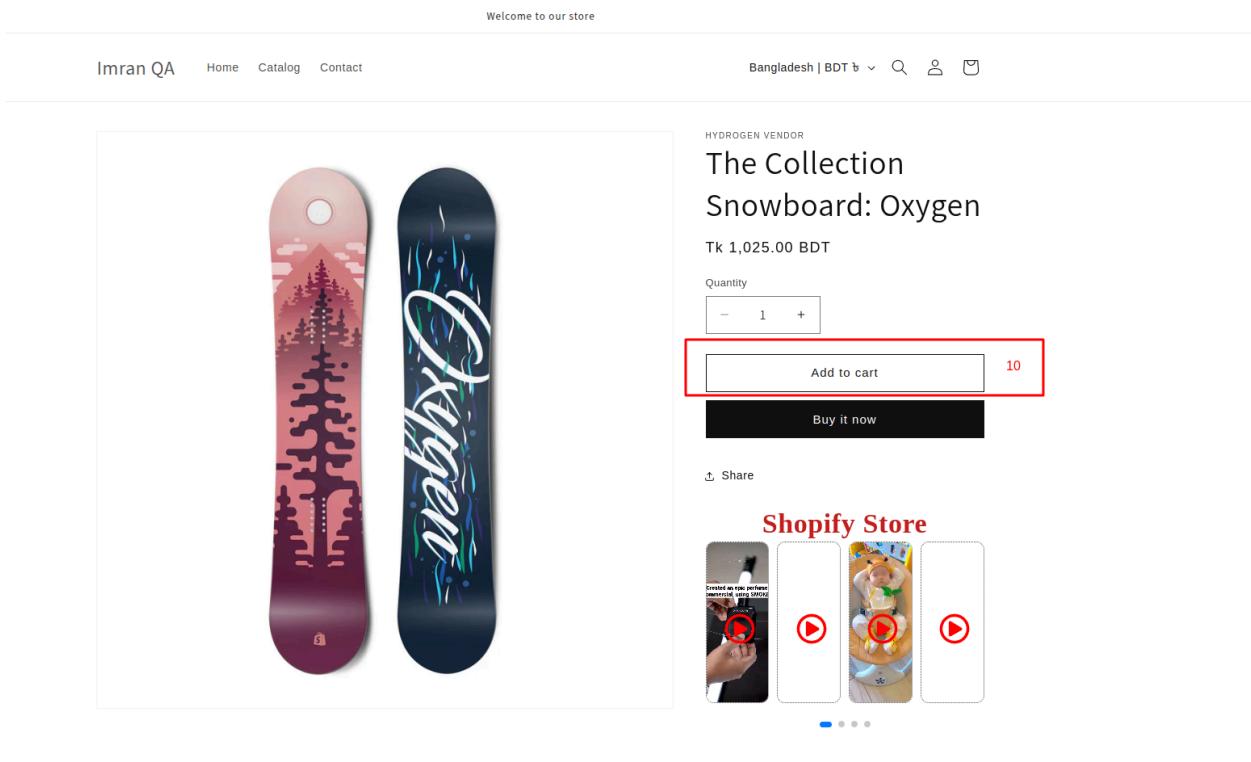

The 'Publish Campaign' button at the bottom left is highlighted with a red box and a red number '8' above it, indicating there are 8 pending actions or notifications.

At the bottom of the page, the footer includes the text '2021 - 2025 © Dynamatic | All right reserved' and links for 'About' and 'Privacy'.

## Shopify store

## Add any item to add to cart

Now you can see dynamatic recommended Engine most bought together items

The image is a composite of two screenshots from a Shopify store. On the left, a 'Dynamatic Cart' sidebar is shown with a red box highlighting a recommended product: 'The Collection Snowboard: Oxygen' at Tk 1,025.00. Below it, there are sections for 'Free Gifts' and 'Gift with a Message'. On the right, the main product detail page for 'The Collection Snowboard: Oxygen' is displayed, showing a large image of the snowboard with a forest design and the word 'Oxygen' in blue. The page includes a quantity selector (set to 1), an 'Add to cart' button, and a 'Buy it now' button. A 'Share' button is also present.

### Step :

1. Go to the Dynamatic Settings page.
2. Click to enable the Dynamatic Product Recommendation toggle.
3. Go to any widget in the Dynamatic app
4. Select the Products Auto option.
5. Choose Dynamatic Recommendation Engine from the list.
6. Click on any methods
7. Now creat a campaign and add widgets (List Widgets)
8. Now publish your campaign
9. Go to your shopify store
10. Add any item to add to cart

**Note:**

To ensure this feature works properly:

Your store should have sufficient product data and customer interaction history for the algorithm to generate effective recommendations.

The feature must be enabled in both the settings and widget configuration.

The widget containing the recommendations must be published and visible on the storefront.

**Purpose:**

Turn on this feature to automatically show personalized product recommendations to your customers based on browsing behavior, most added-to-cart items, bought-together items, most viewed items, etc.

**How It Works:**

When enabled, the Dynamatic Recommendation Engine uses smart algorithms to show relevant product suggestions across your store, including:

Product and web pages

The Dynamatic cart

When this setting is disabled, no automated product recommendations will be displayed.

## 8. Make Checkout Line-Item Removable

The screenshot shows the Dynematic settings interface. On the left, there's a sidebar with various sections like Dashboard, Cart Themes, Analytics, Orders, Campaigns, Placements, Widgets, Audiences, Feeds, and Settings. Under Settings, there are sub-sections: General (selected), Installation, Tools, What's New?, and Upgrade. The main content area is titled 'Settings' and contains several cards:

- Cart Status**: Managing Your Shopping Cart's Visibility with Ease.
- Show Compared At Price**: A toggle switch.
- Force Duplicate Gift removal**: A toggle switch.
- Cart Police**: A toggle switch.
- Apply multiple shareable discount link**: A toggle switch.
- AI Upsell Control**: Intelligent Product Variant Selector.
- Enable Dynamic Product Recommendation**: A toggle switch.
- Font Customization**: Personalizing Typeface and Text Appearance for Optimal Readability and Aesthetic Appeal. It includes a preview of different fonts: Lato, Roboto, Inter, Poppins, and Montserrat.
- Custom CSS**: Tailoring Your Cart's Appearance with Personalized Style Sheets. It shows some CSS code snippets.
- Attribute Logger**: Tailoring Your Cart's Appearance with Personalized Style. It has a placeholder 'Put attribute key here...'.
- Tag Settings**: Manage and customize tags to better suit your organizational needs. It lists categories: area, city, sdfhg, area, city, Tag Name, Product Tag, and Product Tag.
- Custom JavaScript**: Enhancing Your Cart's Functionality with Tailored JavaScript Scripts. It shows some sample code.
- Product Sync**: Sync your products from your store to Shopify and display for sale. It shows a list of products with availability status.

A red box highlights the **Make Checkout Line-item Removable?** toggle switch, which is turned on. Below it, the text 'Checkout Line-item Options' is shown in red, followed by a dropdown menu set to 'All Item'.

Dynamatic setting page turn on Make Checkout Line-item Removable status button.

This screenshot is identical to the one above, but the 'Make Checkout Line-item Removable?' toggle switch is now turned off. The text 'Checkout Line-item Options' is no longer red. The rest of the interface and highlighted areas are the same.

Prefix # Suffix

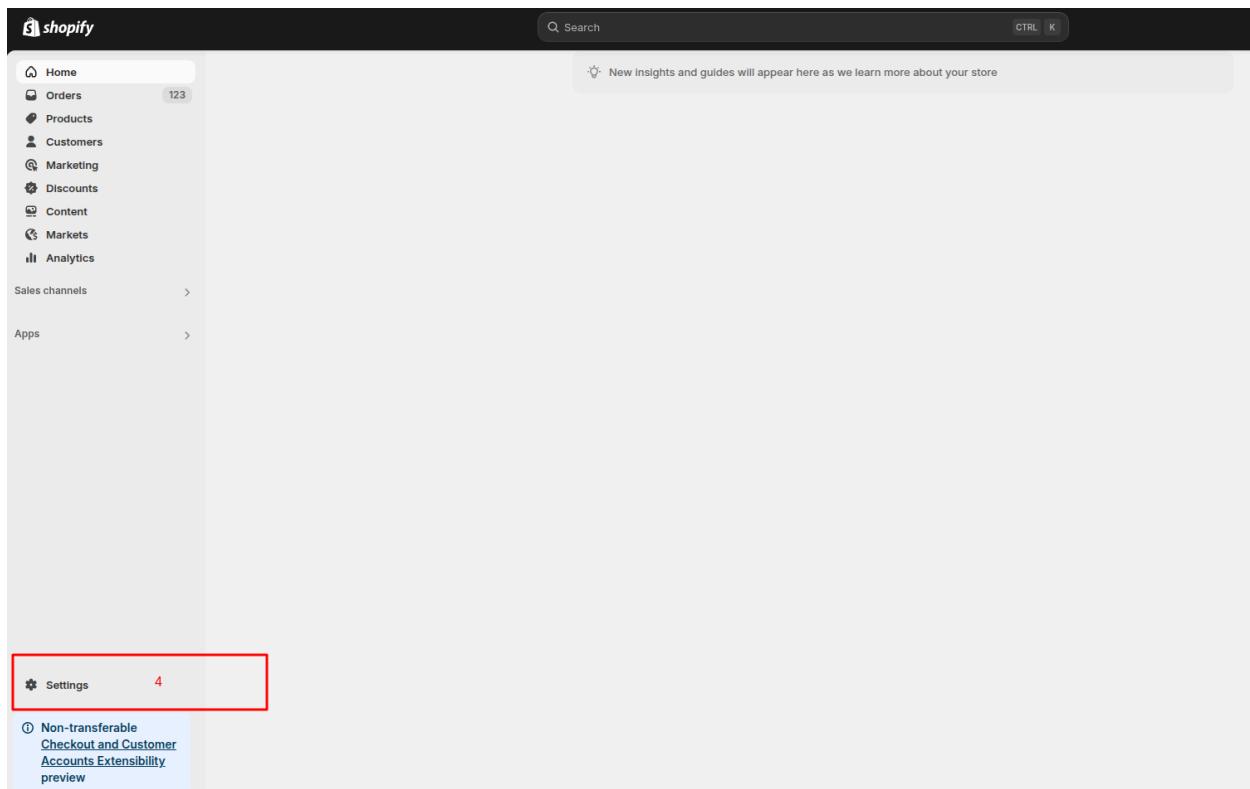

Imran Hossain imran@devnest.llc

This screenshot shows the 'General' settings page in the Shopify admin. The sidebar on the left lists various settings categories, with 'Checkout' highlighted with a red box and the number '2'. The main content area contains sections for 'Store details' (with fields for store name, email, and phone number), 'Store defaults' (including currency display set to Bangladeshi Taka, backup region set to Bangladesh, unit system set to Metric, and time zone set to (GMT+06:00) Astana, Dhaka), and 'Order ID' (which is shown on the order page, customer pages, and customer order notifications). A user profile for 'Imran Hossain' is also visible at the bottom of the sidebar.

## Go to shopify store admin panel

Now click on the setting button.

Now click on checkout button

The screenshot shows the Shopify Admin interface with the 'Checkout' configuration page open. The left sidebar lists various settings: General, Plan, Billing, Users and permissions, Payments, **Checkout**, Customer accounts, Shipping and delivery, Taxes and duties, Locations, Markets, Apps and sales channels, Domains, Customer events, Notifications, Custom data, Languages, Customer privacy, and Policies. The 'Checkout' link is highlighted with a red box and labeled '5'. The main content area shows the 'Checkout' configuration page with sections for 'Configurations' (containing 'Imran QA configuration' status), 'Customer contact method' (with 'Phone number or email' selected), and 'Customer information' (with 'Only require last name' selected). The 'Customize' button at the top right is highlighted with a red box and labeled '6'.

This screenshot shows the same Shopify Admin interface as the previous one, but the 'Checkout' configuration has been customized. In the 'Customer contact method' section, the 'Show a link for customers to track their order with Shop' checkbox is checked. The 'Customer information' section shows 'Only require last name' selected. The 'Customize' button at the top right is highlighted with a red box and labeled '6'.

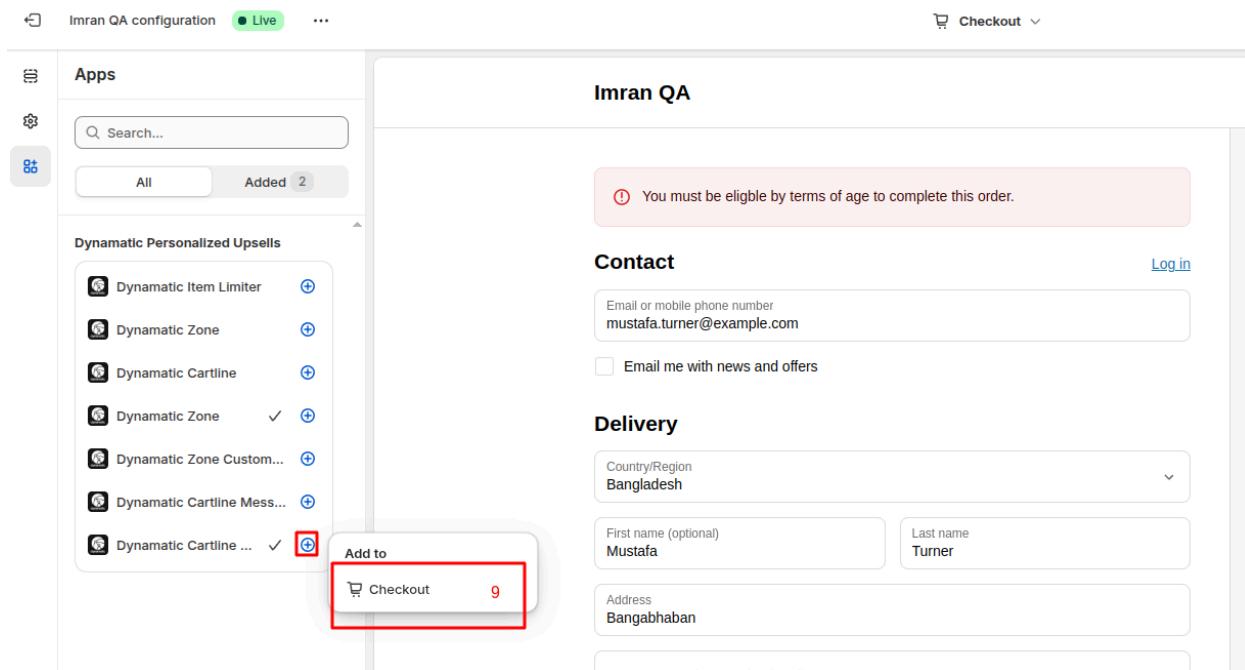

## Click on app block

The screenshot shows the 'Imran QA configuration' interface with the 'Live' button active. On the left, the 'Checkout' section is selected, displaying various configuration options like 'Header', 'Logo', 'Cart link', and an 'Add app block' button. A red box highlights the 'Add app block' button. The main area shows the 'Imran QA' checkout page with a message about age eligibility, contact fields, delivery information, and a shipping method section.

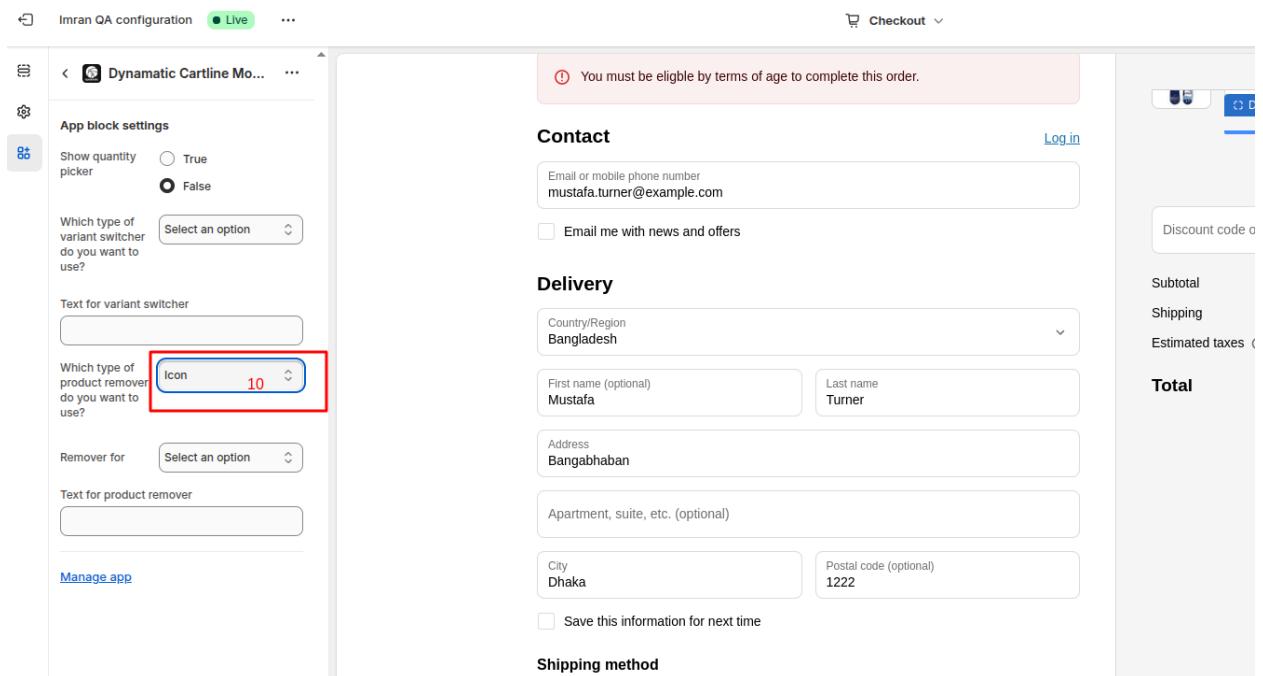

## Click on dynamic cart line modifier

The screenshot shows the 'Imran QA configuration' interface with the 'Live' button active. On the left, the 'Apps' section is selected, showing a list of installed apps including 'Dynamic Item Limiter', 'Dynamic Zone', 'Dynamic Cartline', 'Dynamic Zone', 'Dynamic Zone Custom...', and 'Dynamic Cartline Modifier'. The 'Dynamic Cartline Modifier' item is highlighted with a red box and the number '8' below it. The main area shows the 'Imran QA' checkout page with a message about age eligibility, contact fields, delivery information, and a shipping method section.

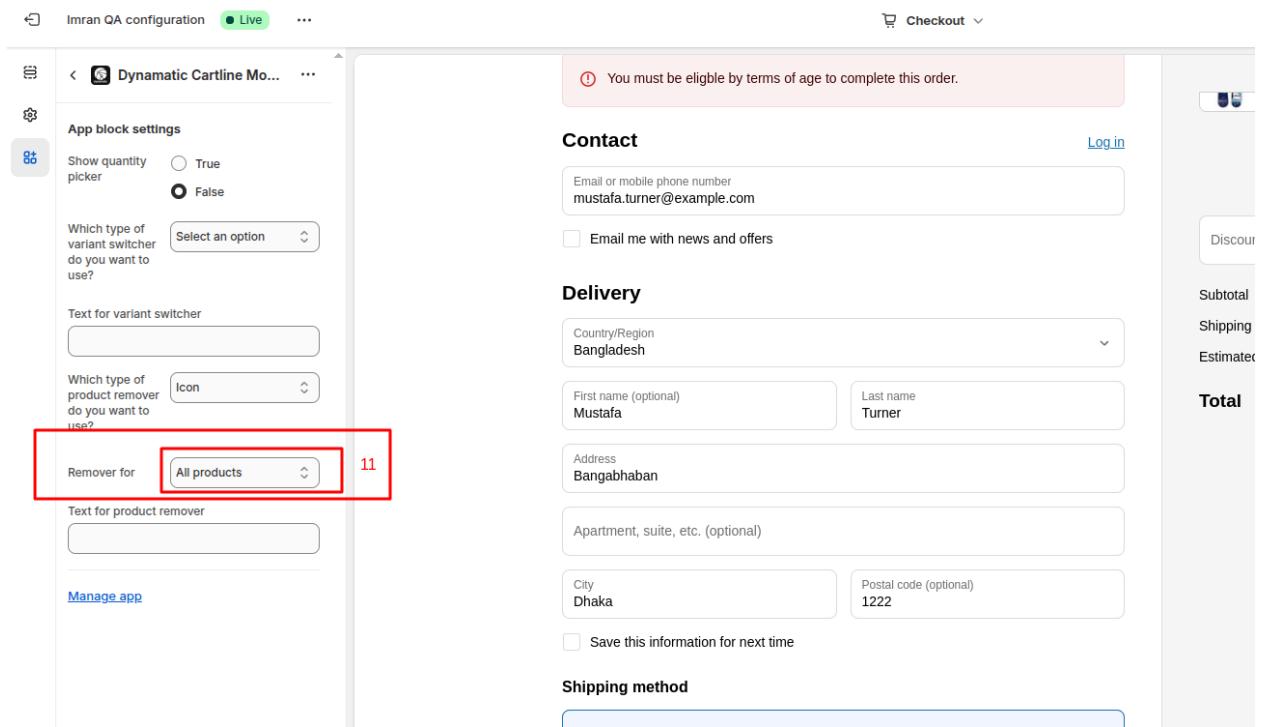

Click on checkout plus button

Click on Which type of product remover do you want to use select icon

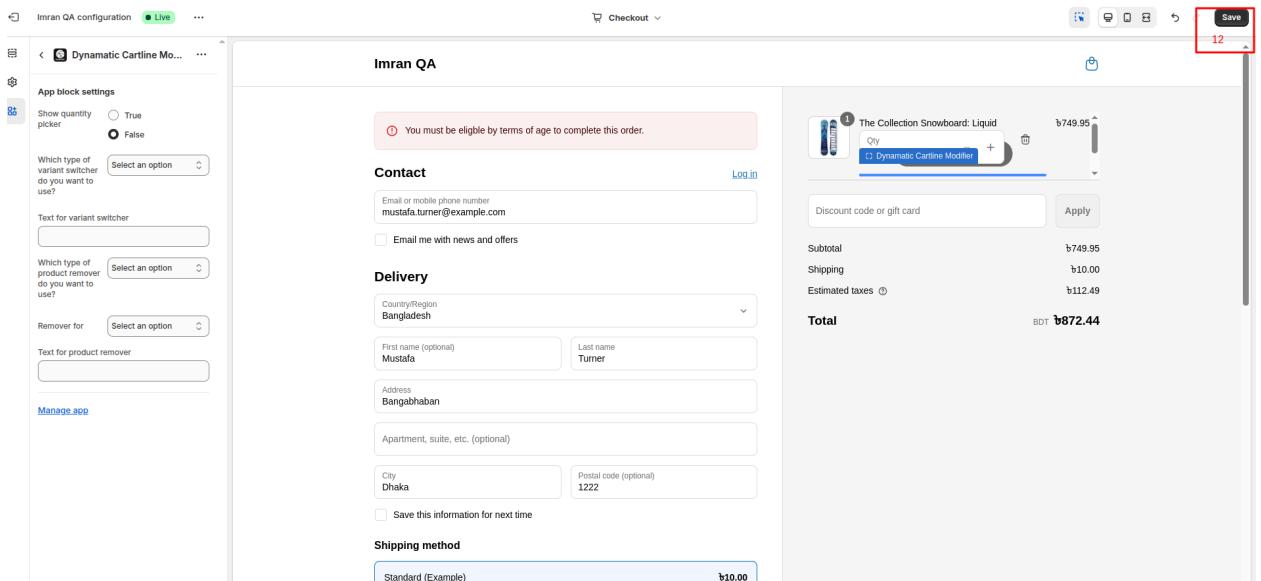

## Click on remove all product

The screenshot shows the Shopify cart page with the Dynamic Cartline Modifier app open. In the app's configuration section, there is a dropdown menu labeled 'Remover for' which is set to 'All products'. This dropdown is highlighted with a red box and has a red number '11' overlaid on its bottom right corner.

## Click on save button

The screenshot shows the Shopify cart page with the Dynamic Cartline Modifier app open. The cart summary on the right side includes a 'Save' button in the top right corner. This button is highlighted with a red box and has a red number '12' overlaid on its bottom right corner.

## Product items variation box is showing

The screenshot shows the Shopify Admin interface. On the left, the 'Imran QA configuration' page is displayed, showing settings for the 'Dynamic Cartline Modifier' app. It includes sections for 'App block settings' (with 'Show quantity picker' set to True), 'Text for variant switcher', 'Text for product remover', and 'Manage app'. On the right, the 'Imran QA' checkout page is shown. At the top right is a 'Checkout' button. The main area contains a 'Contact' section with an email input field (mustafa.turner@example.com) and a checkbox for news offers. Below it is a 'Delivery' section with address fields (Country/Region: Bangladesh, First name: Mustafa, Last name: Turner, Address: Bangabhaban, City: Dhaka, Postal code: 1222). A note at the bottom says 'Save this information for next time'. To the right is a red-bordered box containing a product item: 'The Collection Snowboard: Liquid' (Qty: 1, BDT ৳749.95). Below the item are buttons for 'Discount code or gift card' and 'Apply'. At the bottom right is a 'Total' section showing BDT ৳872.44.

The checkout page now shows a delete icon — you can click it to remove the product

This screenshot shows the same checkout process as the previous one, but with a different product. The product item 'The Collection Snowboard: Hydrogen' (Qty: 1, BDT ৳600.00) is highlighted with a red box. To its right is a delete icon (a small trash bin icon with the number 13). The rest of the page follows the same layout: contact information, delivery details, and a total amount of BDT ৳690.00.

**Step :**

1. Go to dynamatic setting page
2. Click on Make Checkout Line-item Removeable
3. Go to shopify store admin panel
4. Click on settings button
5. Click on checkout
6. Click on customize
7. Click on app block
8. Click on dynamatic cart line modifier
9. Click on checkout
10. Click on Which type of product remover do you want to use select icon
11. Click on remove all product
12. Click on save button
13. Go to your shopify store, then add product to cart click on checkout

**Note:**

To ensure this feature works properly:

Your Shopify theme must support checkout app blocks.

**Purpose:**

This feature gives customers the ability to remove specific line items—such as products, items, free gifts, upsells, or auto-added products—directly from the checkout page.

**How It Works:**

When enabled, any line item added by Dynamatic (such as free gifts or auto-applied upsells) will include a remove icon ("X") on the checkout page.

Customers can click this icon to manually remove the item before completing their order, reducing confusion and improving the checkout experience.

## 9. Make Item Variant Editable

The screenshot shows the 'Settings' page in the Dynamatic dashboard. On the right side, there is a section titled 'Make Checkout Line-item Removable?' with a dropdown menu set to 'All item'. Below it is a red-bordered button labeled 'Make Item Variant Editable?'. This button has a value of '1,2' and a checked status.

Dynamatic setting page turn on Make Item Variant Editable? status button.

This screenshot is identical to the one above, showing the 'Settings' page in the Dynamatic dashboard. The 'Make Item Variant Editable?' button is again highlighted with a red border, showing a value of '1,2' and a checked status.

  - Dynamatic Item Limiter
  - Dynamatic Zone
  - Dynamatic Cartline
  - Dynamatic Zone ✓
  - Dynamatic Zone Custom... +
  - Dynamatic Cartline Modifier ✓ +
  - Dynamatic Cartline ... ✓ + (highlighted with a red box and labeled 8)

**Right Side (Checkout Page):**

- Header: Checkout.
- Message: You must be eligible by terms of age to complete this order.
- Section: Contact (Log in button).
- Input: Email or mobile phone number (mustafa.turner@example.com).
- Input: Email me with news and offers (checkbox).
- Section: Delivery.
- Input: Country/Region (Bangladesh).
- Input: First name (optional) (Mustafa).
- Input: Last name (Turner).
- Input: Address (Bangabhaban).
- Input: Apartment, suite, etc. (optional).
- Input: City (Dhaka).
- Input: Postal code (optional) (1222).
- Input: Save this information for next time (checkbox).
- Section: Shipping method.

Click on checkout plus button

The screenshot shows the Shopify Admin interface for the 'Imran QA configuration' app. On the left, there's a sidebar with 'Apps' selected. In the main area, there's a message: 'You must be eligible by terms of age to complete this order.' Below it, the 'Contact' section has an email field ('mustafa.turner@example.com') and a checkbox for news offers. The 'Delivery' section includes a country dropdown ('Bangladesh'), first name ('Mustafa'), last name ('Turner'), and address ('Bangabhaban'). On the right, there's a 'Log in' link and some discount code fields. A modal window titled 'Add to' is open, showing options like 'Checkout' (which is highlighted with a red box) and '9'.

Click on Which type of product remover do you want to use select icon

The screenshot shows the Shopify Admin interface for the 'Dynamic Cartline Mo...' app. The left sidebar shows 'App block settings' with a 'Show quantity picker' toggle set to 'False'. Under 'Which type of variant switcher do you want to use?', there's a dropdown with 'Select an option' and a red box around the 'Icon' option. Other options include 'Text for variant switcher', 'Remover for' (with a dropdown), and 'Text for product remover'. The right side shows the 'Contact' and 'Delivery' sections of the checkout page, along with a 'Total' summary on the right.

The screenshot shows the 'Imran QA' app configuration page. On the left, there's a sidebar titled 'App block settings' with various configuration options like 'Show quantity picker' (set to True), 'Which type of variant switcher do you want to use?' (set to 'Icon'), and 'Text for variant switcher'. On the right, the main area shows a checkout form with a message 'You must be eligible by terms of age to complete this order.' Below it are sections for 'Contact' (with email 'mustafa.turner@example.com') and 'Delivery' (with address 'Bangabhaban, Dhaka'). A summary section on the right shows a subtotal of ৳749.95, shipping of ৳10.00, and estimated taxes of ৳12.49, totaling ৳872.44. A red box highlights the 'Save' button at the top right.

Select a variant product from your Shopify store

The screenshot shows a product page for a snowboard. On the left, there are two images of the snowboard. On the right, the product details are shown: 'SNOWBOARD VENDOR', 'The Complete Snowboard', 'Tk 699.95 BDT', and a color selection dropdown with options 'Ice' (selected), 'Dawn', 'Powder', 'Electric', and 'Sunset'. A red box highlights the color dropdown. Below it is a quantity selector with value '1'. At the bottom, there are 'Add to cart' and 'Buy it now' buttons, and a note: 'This PREMIUM snowboard is so SUPERDUPER awesome!'. The top navigation bar includes links for Home, Catalog, Contact, and a language selector for Bangladesh | BDT.

Now click on checkout button

The screenshot shows a Shopify cart interface. On the left, a sidebar titled "Dynamatic Cart" displays an "Active cart" section with a single item: "The Complete Snowboard" at ₹699.95, color: Ice. The quantity is set to 1. Below this, there are sections for "Free Gifts" and "Gift with a Message". At the bottom of the sidebar, there are "Checkout" and "Continue Shopping" buttons. A red box highlights the "Checkout" button. On the right, the main content area says "Welcome to our store" and "Browse our latest products". It features a "Shopify Store" banner.

Click on variant button

The screenshot shows the checkout process. On the left, a message says "You must be eligible by terms of age to complete this order." Below it are sections for "Contact" (with fields for email and newsletter sign-up) and "Delivery" (with fields for country, address, city, and postal code). A checkbox "Save this information for next time" is also present. On the right, the cart summary shows "The Complete Snowboard" (Ice) at ₹699.95, quantity 1. A dropdown menu labeled "Select Your Variant" is open, showing "Ice" as the selected option. The total amount is displayed as "Total BDT ₹804.94". A red box highlights the "Select Your Variant" dropdown. Another red box highlights the total amount "16 ₹699.95".

Now you can see the product variant

The screenshot shows a Shopify checkout process. On the left, there's a sidebar with contact and delivery information. A red box highlights a required field message: "You must be eligible by terms of age to complete this order." On the right, the cart summary shows a product: "The Complete Snowboard" with a price of "৳699.95". Below it is a "Select Your Variant" dropdown menu with options: "Ice", "Dawn", "Powder", "Electric", and "Sunset". The "Ice" option is selected. The total cost shown is "৳804.94".

### Step :

1. Go to dynamatic setting page
2. Click on Make Item Variant Editable?
3. Go to shopify store admin panel
4. Click on settings button
5. Click on checkout
6. Click on customize
7. Click on app block
8. Click on dynamatic cart line modifier
9. Click on checkout
10. Click on Which type of product remover do you want to use? Select this option select icon
11. Click on Which type of variant switcher do you want to use? Select this options elect icon and
12. Click on true radio button
13. Click on save button
14. Go to your Shopify store, choose a variant product, and click 'Add to Cart'
15. Click on the checkout button
16. Click on variant button

**Note:**

To ensure this feature works correctly:

The product must have at least two variants (e.g., different sizes or colors) configured in Shopify.

The campaign or widget must be published and visible on your storefront.

**Purpose:**

Enable this feature to allow customers to change the variant (such as size, color, or style) of a product already added to the cart—without needing to remove and re-add the item.

**How It Works:**

When enabled, customers will see an “Edit” option next to any cart item with multiple variants.

Clicking the Edit button opens a quick selector or modal that allows customers to change the variant (e.g., switch from medium to large).

The cart will automatically update to reflect the selected variant.

## 10. Font Customization

The screenshot shows the 'Settings' page of the dynamatic app. On the left is a sidebar with navigation links like Dashboard, Cart Themes, Analytics, Orders, Campaigns, Placements, Widgets, Audiences, Feeds, Settings (selected), General, Installation, Tools, and What's New?.

The main area has a title 'Settings' and several sections:

- Cart Status**: Managing Your Shopping Cart's Visibility with Ease. Includes toggles for 'Show Compared At Price', 'Force Duplicate Gift removal', 'Cart Police', and 'Apply multiple shareable discount link'.
- Font Customization** (highlighted with a red box): Personalizing Typeface and Text Appearance for Optimal Readability and Aesthetic Appeal. It includes a preview of various fonts (Lato, Lemon Milk, Roboto, Inter, Poppins, Montserrat) and a code editor for 'Custom CSS'.
- Custom CSS**: Tailoring Your Cart's Appearance with Personalized Style Sheets. Shows a snippet of CSS code for .nvd-footer-inner-crt.
- AI Upsell Control**: Intelligent Product Variant Selector. Includes toggles for 'Enable Dynamatic Product Recommendation' and 'Make Checkout Line-item Removable?'.
- Custom JavaScript**: Enhancing Your Cart's Functionality with Tailored JavaScript Scripts. Shows a snippet of JS code for 'Type some code'.
- Product Sync**: Sync your products from your store to Shopify and display for sale.

At the bottom right of the main area is a 'Save Changes' button.

  

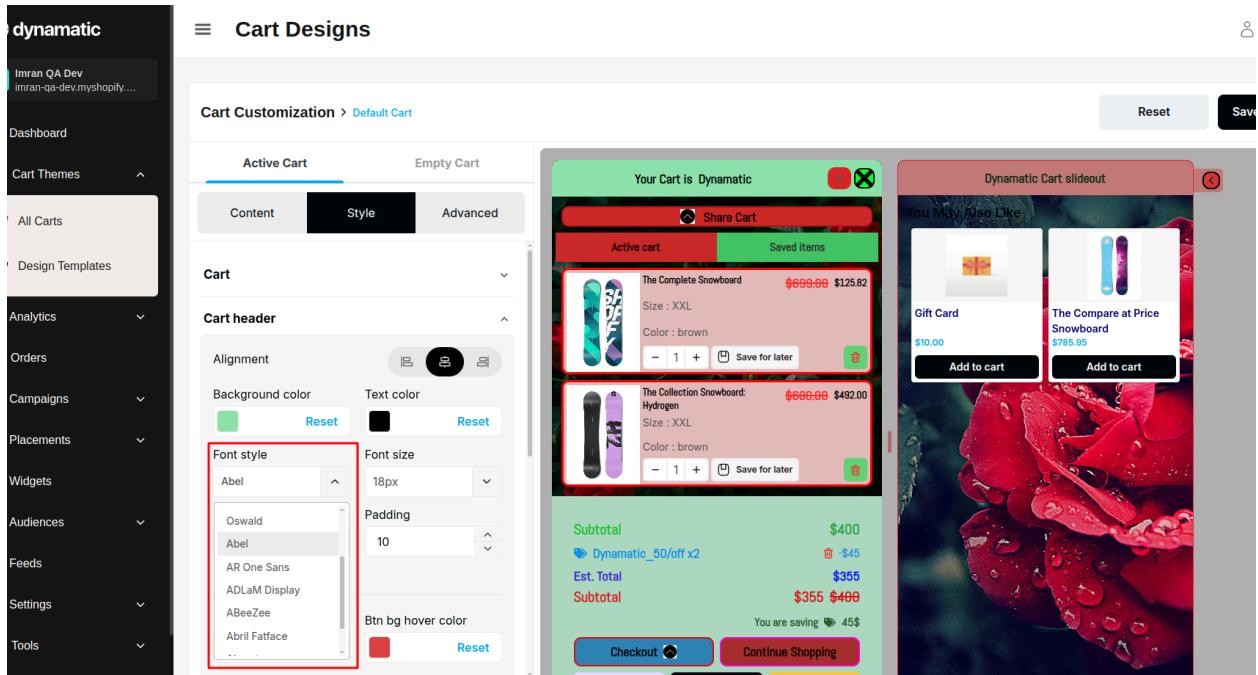

This screenshot shows the 'Font Customization' sub-page under the 'Settings' section. The sidebar remains the same.

The main area has a title 'Settings Font Customization' and contains two main sections:

- Font Customization**: A search bar 'Search google fonts' with a placeholder 'Type the google font you want to show'. Below it is a list of checked fonts: ABeeZee, ADLaM Display, AR One Sans, and Abel (which is highlighted with a red box). There are also uncheckable options like Abhaya Libre. Below the list are font selection buttons for Roboto, Lato, Montserrat, and Oswald, followed by a list of applied fonts: Abel, AR One Sans, ADLaM Display, ABeezee, AbrilFatface, and ABORETO.
- Previewing Roboto**: A preview area where different weight styles of Roboto are shown. The preview text 'This is the font style' is repeated for each weight: Thin 100, Light 300, Regular 400, Medium 500, Bold 700, and Black 900.

At the bottom of the preview area is a note: 'Please ensure that the font names are precise and match those available on Google Fonts to ensure'.

## Step :

1. Go to dynomatic setting page
2. Click on Font Customization
3. Click on Google Fonts
4. choose any fonts
5. Click on save changes button
6. go to any widgets
7. or any feature property like cart profile
8. Click on style
9. click on cart header
10. Click on font style

## Purpose:

This feature allows you to customize the fonts used across your storefront to better match your brand's style and tone.

## How It Works:

Choose from a selection of web-safe and Google Fonts directly within the app.

Apply fonts to different sections such as headings, body text, buttons, and product titles.

Preview changes in real-time before publishing.

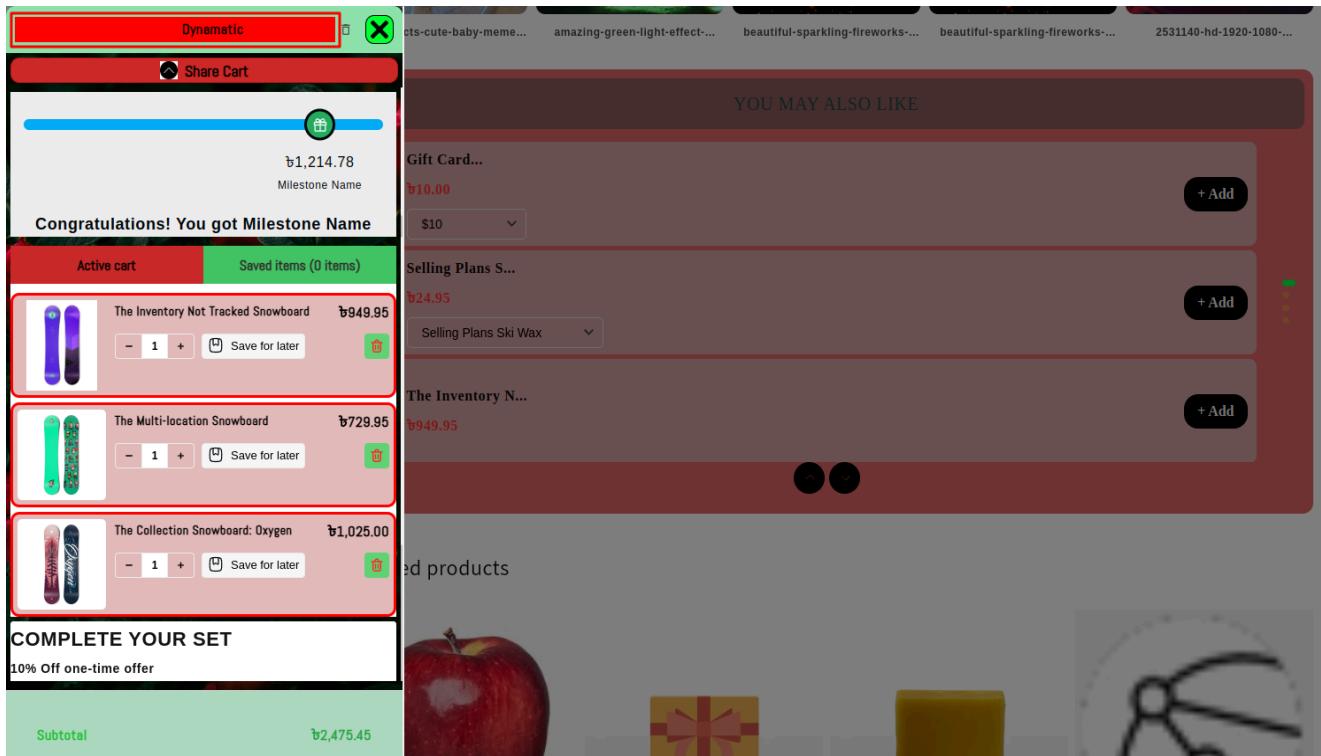

## 11. Custom CSS

The screenshot shows the 'Settings' page of the dynamatic app. On the left is a sidebar with various sections like Dashboard, Cart Themes, Analytics, Orders, Campaigns, Placements, Widgets, Audiences, Feeds, and Settings. Under Settings, there's a 'General' section which is currently selected, and below it are 'Installation' and 'Tools'. The main content area is titled 'Settings' and contains several sections: 'Cart Status' (with toggles for 'Show Compared At Price', 'Force Duplicate Gift removal', 'Cart Police', and 'Apply multiple shareable discount link'), 'AI Upsell Control' (with toggles for 'Intelligent Product Variant Selector' and 'Enable Dynamic Product Recommendation'), 'Make Checkout Line-item Removable?' (toggled off), and 'Make Item Variant Editable?' (toggled off). Below these are three cards: 'Font Customization' (listing fonts like Lato, Lemon Milk, Roboto, Inter, Poppins, and Montserrat), 'Custom CSS' (with a code editor containing a snippet for a .nvd-footer-inner-crt class), and 'Custom JavaScript' (with a code editor containing a snippet for a .nvd-footer-inner-crt class). A red box highlights the 'Custom CSS' card.

This screenshot shows the 'Settings Custom Css' page. It has a similar sidebar to the top one. The main content is titled 'Custom CSS' and features a code editor with the following content:

```
Editor
1 .dyn-heading-text-left{
2   color: #red;
3 }
4 .dyn-cart-heading-title{
5   background-color: #red !important;
6 }
```

On the right side of the editor are two small icons: a gear and a link. In the top right corner, there is a 'Save Changes' button.

### Step :

1. Go to dynamatic setting page
2. Click on Custom CSS
3. Write CSS.
4. Go to the Shopify store.

### Purpose:

Add your own custom CSS to fine-tune the look and feel of your storefront beyond the default settings provided by the app.

### How It Works:

Enter any valid CSS code to override or extend existing styles.

Changes can apply to specific elements like product cards, buttons, typography, layout spacing, and more.

Custom CSS is applied on top of the current theme and Dynamatic styles, giving you full control over design customization.

## 12. Custom JavaScript

The screenshot shows the 'Settings' page of the Dynamic Cart interface. On the left sidebar, under 'General', 'Installation', and 'Tools', there is a red box highlighting the 'Custom CSS' section. This section contains a code editor with the following CSS:

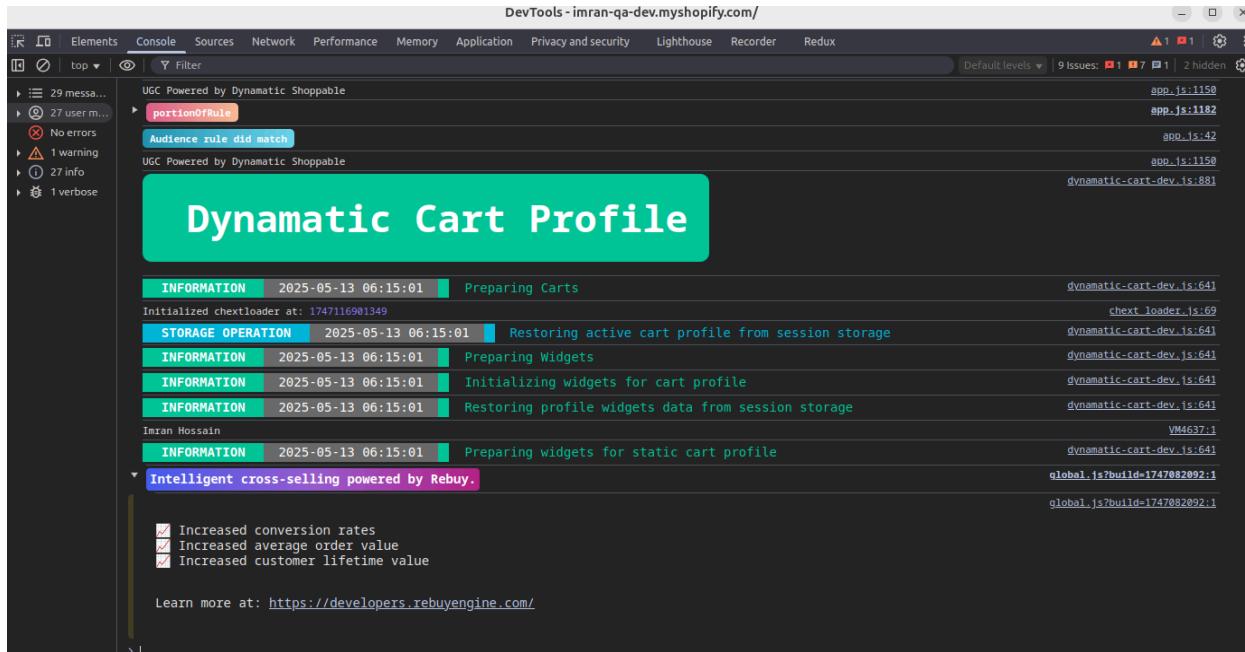

```
// Type some code ->
console.log("Hello World");
// For each item in cart
for (let item of cart.items) {
    // Getters
    let {name, quantity} = item;
    console.log(`Name: ${name}, Quantity: ${quantity}`);
}
```

Below the code editor, there are several dropdown menus for selecting CSS classes or IDs, such as 'area', 'city', 'sdfhg', 'Tag Name', and 'Product Tag'. To the right of the code editor, there is a 'Save Changes' button.

The screenshot shows the 'Settings Custom Js' page of the Dynamic Cart interface. On the left sidebar, under 'General', 'Installation', and 'Tools', there is a red box highlighting the 'Editor' section. This section contains a code editor with the following JavaScript:

```
1 console.log("Imran Hossain")
```

To the right of the code editor, there is a 'Save Changes' button. At the bottom of the page, there is a footer with the text '2021 - 2025 © Dynamic | All right reserved' and links for 'About' and 'Privacy'.

## Step :

1. Go to dynamatic setting page
2. Click on Custom JS
3. Write js code
4. Go to shopify
5. Then inspect
6. Go to console
7. See Imran hossain

## Purpose:

Inject custom JavaScript code into your storefront to add advanced functionality, tracking, or third-party integrations that go beyond default features.

## How It Works:

Enter valid JavaScript code to run on your store's frontend.

Use it to add custom interactions, modify UI behavior, connect external tools (like analytics or chat widgets), or run dynamic scripts.

Scripts are loaded after the main Dynamatic and theme scripts to avoid conflicts.

## 13. Product Sync

The screenshot shows the 'Settings' section of the Dynamatic app. On the left, there's a sidebar with various options like Dashboard, Cart Themes, Analytics, Orders, Campaigns, Placements, Widgets, Audiences, Feeds, and Settings. Under Settings, 'General' is selected. The main area has several sections: 'Cart Status' (with toggles for Show Compared At Price, Force Duplicate Gift removal, Cart Police, and Apply multiple shareable discount link), 'AI Upsell Control' (with toggles for Intelligent Product Variant Selector and Enable Dynamic Product Recommendation), 'Custom CSS' (showing a preview of different fonts and some CSS code), 'Custom JavaScript' (showing a preview of a code editor with some JS code), and 'Product Sync' (which is highlighted with a red border). The 'Product Sync' section has a sub-headline 'Sync your products from your store to Shopify and display for sale'.

### Purpose:

Keep your product data up-to-date by automatically syncing changes from your Shopify store with the Dynamatic app.

### How It Works:

When enabled, any updates made to products in your Shopify admin (e.g., title, price, inventory, images) will be automatically reflected in Dynamatic.

Sync occurs in real time or at regular intervals, ensuring that your storefront always displays the most current product information.

## 14. Attribute Logger

### Purpose:

This logic reads query parameters from the current page URL and checks if any of the parameter keys match expected attributes defined in attributeLogger. If a match is found, the attributes are stored in the cart, and a flag is set in sessionStorage for later use (redirecting to a landing page after an action like "Continue Shopping").

### How It Works:

When enabled, Dynamatic automatically records key attributes such as product views, clicks, add-to-cart actions, variant selections, and more.

Logged attributes can be used to improve AI recommendations, segment customers, or trigger specific marketing or upsell strategies.

You can also define and log custom attributes based on your store's needs.

The screenshot shows the Dynamatic app's Settings page. On the left is a sidebar with navigation links like Dashboard, Analytics, Orders, Campaigns, Placements, Widgets, Audiences, Feeds, General, Installation, Tools, What's New?, and Upgrade. The main area is titled 'Settings' and contains several sections: 'Cart Status', 'Font Customization' (highlighted with a red box), 'Custom CSS', 'Custom JavaScript', and 'Product Sync'. The 'Font Customization' section has a preview of a logo with various fonts and a code editor showing CSS for font styling. The 'Attribute Logger' section, also highlighted with a red box, has a placeholder 'Put attribute key here...'. At the bottom, there's a 'Tag Settings' section for managing organizational tags.

## 15. Tag Settings

The screenshot shows the 'Settings' page with a sidebar containing various store management options like Dashboard, Cart Themes, Analytics, Orders, Campaigns, Placements, Widgets, Audiences, Needs, General, and Installation. The main content area is titled 'Settings' and includes sections for 'Font Customization', 'Custom CSS', 'Custom JavaScript', and 'Product Sync'. A red box highlights the 'Tag Settings' section, which contains a sub-section titled 'Attribute Logger' with a placeholder 'Put attribute key here...'. Below this is another red box containing a list of tags: 'area', 'city', 'sdfhg', 'area', 'city', 'Tag Name', 'Product Tag', and 'Product Tag'. The 'Tag Settings' section is described as managing and customizing tags to better suit organizational needs.

The screenshot shows the 'Settings Tags' page with a sidebar. The main content area is titled 'Tag Settings' and features a 'Global' tab. Under the 'Global' tab, there is a list of tags: 'Team Dyna', 'Global Tag SP' (which is highlighted with a red box and has a red number '2' next to it), and 'Global Tag'. To the right of the list are edit and delete icons for each tag entry. A 'Type to Search' input field is also present.

**Step :**

1. Go to dynamatic settings page
2. Click on add tag (global and internal)
3. go to any feature (Campaigns, placemats, widgets, audiences, feed)
4. click on add tag

**Purpose:**

Use tags to organize, filter, and trigger specific behaviors for your products within the Dynamatic app.

**How It Works:**

Assign tags in your Shopify product admin (e.g., upsell, featured, hide-from-recommendations, etc.).

Dynamatic reads these tags and uses them to apply special rules—such as showing products in specific sections or enabling dynamic features like custom displays.

You can define how each tag behaves through this settings panel.
